Mendocino County Employees Retirement Association, "MCERA"

MCERA is a retirement system, organized under the County Employees Retirement Law of 1937, which provides retirement, disability and death benefits to the employees, retirees and former employees of the County of Mendocino, the Mendocino County Superior Court and the Russian River Cemetery District.

MCERA's principal responsibilities include management of the trust fund, delivery of retirement, disability and death benefits to eligible members, administration of cost-of-living programs and general assistance in retirement and related benefits.

Mission

Providing sustainable pensions, retirement planning education, and professional services to current and future members.

Vision

To be a trusted resource for a well-planned and secure retirement.

Guiding Principles

- We are mindful of the impacts to individual members when we fulfill our fiduciary role of making decisions in the best interests of all members
- We value professionalism, inclusion, and collegiality in doing our work.
- We take the long term into consideration in everything we do while remaining adaptable and flexible in the short term.

Strategic Goals

- Protect the Plan's long-term financial health.
- Strengthen risk oversight.
- Improve effectiveness and efficiency through people, processes, and technology.
- Develop MCERA's reputation as a retirement benefits expert.

Board of Retirement
Mendocino County Employees Retirement Association
625-B Kings Court
Ukiah, CA 95482

To the Trustees, Members and Beneficiaries, and Participating Employers of the Mendocino County Employees Retirement Association:

It is with great pleasure that we submit the Annual Comprehensive Financial Report (ACFR) of the Mendocino County Employees Retirement Association (MCERA, Plan or System) as of and for the fiscal year ended June 30, 2025. MCERA management is responsible for the contents of the ACFR.

The following section provides an overview and analysis of the MCERA financial activities for the year ended June 30, 2025. We encourage readers to take into account the information presented here in conjunction with additional information we have furnished in the financial statements.

Mendocino County Employees Retirement Association (MCERA)

MCERA is a cost-sharing, multi-agency public employees' retirement system, established by the County of Mendocino on January 1, 1948 to provide retirement, disability, death, and survivor benefits in accordance with the California State Government Code, Section 31450, et. seq. (the County Employees Retirement Law of 1937, hereinafter "CERL") and Section 7522 et. seq. (the Public Employees' Pension Reform Act of 2013, hereinafter "PEPRA"). MCERA is an independent agency within the County of Mendocino with a separate operating budget and professional staff. The California Constitution gives the Board of Retirement (Board) plenary authority over the administration of the System, which includes administering Plan benefits and managing the assets. The Board and MCERA staff members are committed to act for the exclusive benefit of the Plan and its participants, manage the assets of the plan prudently and administer benefits with impartiality. To fulfill this mandate, MCERA employs a skilled professional staff and independent consultants that operate under a system of governance, operational and fiduciary policies and procedures.

The Board is comprised of nine members and one alternate: two elected by the active general membership, one elected by the active safety membership, one regular and one alternate elected by the retired membership, four appointed by the Mendocino County Board of Supervisors, and the Mendocino County Auditor-Controller/Treasurer-Tax Collector, who serves as an ex-officio member.

Participating agencies in MCERA include the County of Mendocino, the Superior Court of Mendocino County, and the Russian River Cemetery District.

Financial Reporting

MCERA management is responsible for establishing a system of internal controls to safeguard assets and for the complete and fair presentation of the financial information in accordance with generally accepted accounting principles (GAAP) in the United States. To the best of our knowledge, the enclosed data is accurate in all material respects and is reported in a manner designed to fairly present the financial position and operating results of MCERA.

Brown Armstrong Accountancy Corporation provides financial statement audit services and related disclosures. Management recognizes the inherent limitations that internal controls do not provide absolute assurance against errors and material misstatement in the financial statements, and that we should only implement controls where benefits outweigh the costs. However, management is confident that its system of internal controls provides reasonable assurance that MCERA's financial statements are presented in conformity with accounting principles generally accepted in the United States and are free from material misstatements.

This report has been prepared in accordance with GAAP as promulgated by the Governmental Accounting Standards Board ("GASB"). GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of management's discussion and analysis ("MD&A"). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The System's MD&A can be found on page 15.

Budget

CERL section 31580.2(a) limits MCERA's annual administrative expenses to twenty-one hundredths of one percent (0.21%) of MCERA's actuarial accrued liability or \$2 million, as indexed for cost-of-living adjustments, whichever is greater. Section 31580.2(b) provides an exclusion from the budgetary cap for computer software, hardware, and computer technology consulting services (identified herein as IT costs).

The Board of Retirement approves MCERA's annual budget. The Board of Retirement's policy is that administrative expenses incurred in any year will not exceed twenty-one hundredths of one percent (0.21%) of MCERA's actuarial accrued liability, unless authorized by a separate vote of the Board of Retirement.

MCERA's actual administrative expense excluding IT and Investment costs for fiscal year 2024-25 was \$1,285,122, which represented 0.14% of MCERA's actuarial accrued liability.

Major Initiatives and Significant Events

Several major initiatives were undertaken during the fiscal year including:

- MCERA received a Compliance Statement, dated September 9, 2024, from the Internal Revenue Service (IRS) agreeing to the corrective actions and changes in administrative procedures in MCERA's IRS Voluntary Compliance Program (VCP) application. The corrections required by the VCP were completed in June 2025, bringing the VCP application to a successful close. This action addressed past operational and governance issues and reduces MCERA's financial, operational and reputational risks going forward.
- The Board adopted new Succession Planning and Service Provider Evaluation Policies. The Succession Plan address operational risk by providing a detailed, multi-layered process to minimize business interruptions stemming from transitions in critical roles.
- In February 2025, MCERA processed its first Domestic Relations Order Separate Account benefit.
- In furtherance of Strategic Plan objectives, the Board adopted a formalized New Trustee Orientation program and established an Agreed-Upon Procedures (AUP) audit program. The two year AUP program commences on July 1, 2025. These programs reduce governance and operational risks inherent in the system.
- The Board negotiated an agreement with the County of Mendocino and the labor union to use 5 California County retirement systems as market comparator agencies for MCERA staff, added a dedicated Retirement Accountant position, and adopted Government Code Section 31522.2, designating the Retirement Financial Investment Officer's employment as at the will of the Board of Retirement. The wage agreement ensures MCERA staff wages remain market competitive, while the job position changes ensure further separation of job duties.
- MCERA continued the investment portfolio structure review begun last year, deciding to change the international equity structure to mirror the domestic equity structure. The Board hired three new investment managers: a passive index and two active managers. This change better aligns the international equity portfolio with the asset class benchmark and lowers total portfolio active risk.
- Completed building accessibility upgrades on the 625 Kings Court asset.
- The Board saw the elected Auditor-Controller/Treasurer-Tax Collector refill the 1st seat, while the Board of Supervisors appointee filled the 5th seat.

Investments

The Board of Retirement has exclusive control of all investments of the retirement system and is responsible for establishing investment objectives, strategies and policies. Pursuant to the California Constitution and the 1937 Act, the Board is authorized to invest in any form or type of investment deemed prudent in the informed judgment of the Board. In making decisions regarding the MCERA investment portfolio, the Board acts in a fiduciary capacity and must discharge its duties in accordance with fiduciary principles. In carrying out its investment responsibilities, the Board receives guidance from a professional investment consultant, Callan Associates, Inc.

In accordance with state constitutional mandates, the Board adopts an investment policy designed to ensure diversification among asset classes and achieve MCERA's long-term investment objectives. The time-weighted investment return for the year ending June 30, 2025 was 12.33%, net of fees, which outperformed the

benchmark by 0.45%. Performance returns were 10.00%, 9.64%, 7.85%, and 7.72% net of fees for the three, five, seven, and ten-year periods ending June 30, 2025, respectively. A time-weighted rate of return negates the effects of cashflows into and out of an investment.

The rate of return on MCERA's investment portfolio is an integral component of the annual additions to the pension plan as total investment income is typically the largest contributor to the Plan's annual additions to retirement plan assets.

More detailed information regarding MCERA's strategic asset allocation, professional investment managers, and investment performance can be found in the Investment Section starting on page 49.

Funded Status and Actuarial Reporting

The Board engages a qualified, independent actuarial firm to perform annual valuations of the retirement plan. Additionally, MCERA obtains a detailed study of the retirement plan's economic and non-economic assumptions every three years, wherein the actuary makes recommendations to the Board regarding the assumptions to be used to measure the liabilities and assets of the fund. The primary purpose of these studies is to help determine the actuarially required level of contributions needed to meet costs associated with annually accruing benefit commitments (normal cost) and eliminate any past unfunded liabilities (Unfunded Actuarial Accrued Liability or "UAAL") within the plan's amortization period.

MCERA maintains a funding goal to establish contributions that fully fund the System's liabilities and that, as a percentage of payroll, remain as level as possible for each generation of active members. The use of realistic assumptions is important in maintaining the necessary funding to pay promised benefits. Each year, the actual experience of the system is compared to our assumptions, and the differences are studied to determine whether changes in the contribution requirements are necessary. In addition, triennially, an actuarial experience investigation is undertaken to review the actuarial assumptions and compare the actual experience during the preceding three-year period with that expected under those assumptions.

In the June 30, 2025 valuation, the ratio of actuarial valuation value of assets to the actuarial accrued liabilities was 76.4%, which was an increase from the prior year's valuation funded ratio of 74.2%. MCERA's unfunded actuarial accrued liability (UAAL) as of June 30, 2025, was \$234.9 million. On a fair value of assets basis, the UAAL would be \$203.4 million.

Prior to July 1, 2012, the total UAAL was being amortized on a 30-year decreasing period, with 27 years remaining as of June 30, 2012. On December 15, 2021, the Board reduced the amortization period for the 2012 UAAL restart layer by 3 years, from 18 years remaining as of June 30, 2021 to 15 years.

As of June 30, 2025, there are 11 years remaining in the declining 30-year amortization period of the 2012 UAAL restart layer. On or after July 1, 2012, any new UAAL resulting from plan amendments will be amortized over different amortization periods. Investment gains and losses as well as any assumption and method changes will be amortized over an 18-year period.

Certificate of Achievement

The Government Finance Officers Association of the United States and Canada (“GFOA”) awarded a Certificate of Achievement for Excellence in Financial Reporting to MCERA for its annual comprehensive financial report for the fiscal year ended June 30, 2024, on page 6 of the Introductory Section. In order to be granted this national award, a governmental entity must publish an easily readable and efficiently organized ACFR that meets the highest standards of governmental financial reporting. The Certification of Achievement is valid for a period of one year. We believe that this report for the fiscal year ended June 30, 2025 will again meet the requirements of the Certificate of Achievement Program and we are submitting it to the GFOA for consideration of an annual award.

Acknowledgements

MCERA has many contributors to its success. The preparation of this ACFR reflects the combined efforts of the MCERA staff, Robert Reveles, Judy Zeller, Nora Morgan, Michael Angulo, and Octavio Quintero along with consultants, Callan Investment Consultants, Segal Consulting, and Brown Armstrong Accountancy Corporation, all who made significant contributions of time, effort, and expertise.

For their commitment to MCERA, and for their diligent work to assure MCERA’s continued successful operations, sincere thanks are owed to the Board of Retirement and all of our advisors.

Request for Information

The financial report is designed to provide the MCERA Board of Retirement, our membership, taxpayers, investment managers and creditors with a general overview of MCERA finances and to account for the money it receives. Questions concerning any of the information in this report or requests for additional financial information should be addressed to:

INDEPENDENT AUDITOR'S REPORT

To the Audit Committee and Board of Retirement of
Mendocino County Employees' Retirement Association
Ukiah, California

Report on the Audit of the Financial Statements

Opinions

We have audited the accompanying Statement of Fiduciary Net Position of the Mendocino County Employees' Retirement Association (MCERA), a pension trust fund and component unit of the County of Mendocino, California, as of June 30, 2025, the related Statement of Changes in Fiduciary Net Position for the fiscal year then ended, and the related notes to the basic financial statements, which collectively comprise MCERA's basic financial statements as listed in the table of contents.

In our opinion, the basic financial statements referred to above present fairly, in all material respects, the fiduciary net position of MCERA, as of June 30, 2025, and the respective changes in fiduciary net position for the fiscal year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of MCERA and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about MCERA's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Management is also responsible for maintaining a current plan instrument, including all MCERA plan amendments; administering MCERA; and determining that MCERA's transactions that are presented and disclosed in the financial statements are in conformity with MCERA's plan provisions, including maintaining sufficient records with respect to each of the participants, to determine the benefits due or which may become due to such participants.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of MCERA's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about MCERA's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis (MD&A) and required supplementary information (RSI), as listed in the table of contents, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the MDA& and RSI in accordance with GAAS, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Supplementary Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise MCERA's basic financial statements. The accompanying other supplementary information, as noted in the table of contents, is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with GAAS. In our opinion, the other supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the Annual Comprehensive Financial Report. The other information comprises the introductory, investment, actuarial, and statistical sections but does not include the basic financial statements and our auditor's report thereon. Our opinion on the basic financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Report on Summarized Comparative Information

We have previously audited MCERA's June 30, 2024 basic financial statements, and our report dated December 4, 2024, expressed an unmodified opinion on those audited basic financial statements. In our opinion, the summarized comparative information presented herein as of and for the fiscal year ended June 30, 2024, is consistent, in all material respects, with the audited basic financial statements from which it has been derived.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated December 8, 2025, on our consideration of MCERA's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of MCERA's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering MCERA's internal control over financial reporting and compliance.

Management's Discussion and Analysis – June 30, 2025

This section presents Management's Discussion and Analysis (MD&A) of Mendocino County Employees' Retirement Association's (MCERA or Plan) financial results and a summary of MCERA's financial position and activities as of and for the fiscal year ended June 30, 2024. We encourage readers to take into account the information presented here in conjunction with additional information we have furnished in the basic financial statements.

MCERA provides service retirement, disability, death, and survivor benefits, and is administered in accordance with the County Employees Retirement Law of 1937 (Government Code Section 31450, et seq.). Pursuant to certain provisions of the County Employees Retirement Law of 1937, MCERA is a multi-agency public employees' retirement system, established by the County of Mendocino on January 1, 1948, and is an independent agency within the County of Mendocino, with a separate operating budget and professional staff.

The California Constitution gives the Board of Retirement (Board) plenary authority over the administration of MCERA, which includes administering MCERA benefits and managing the assets. The Board and MCERA staff members are committed to act for the exclusive benefit of MCERA and its participants, manage the assets of MCERA prudently, and administer benefits with impartiality. To fulfill this mandate, MCERA employs a skilled professional staff and independent consultants that operate under a system of governance, operational, and fiduciary policies and procedures.

Participating agencies in MCERA include the County of Mendocino, the Superior Court of Mendocino County, and the Russian River Cemetery District.

Financial Highlights

- Fiduciary net position increased to \$793.4 million, which reflects an increase of 10.95% in net position during fiscal year 2024-25.
- Actuarial determined assets increased to \$761.9 million, a 6.6% increase during fiscal year 2024-25.
- Net total additions to fiduciary net position for the fiscal year totaled \$131.5 million. This was comprised of \$36.5 million of employer contributions, \$9.4 million of member contributions, and a net investment gain of \$85.5 million.
- Deductions from fiduciary net position for the fiscal year were \$53.1 million, which included \$50.2 million in benefit payments to retirees, \$1.4 million in member refunds, and \$1.5 million in total administrative expenses.
- MCERA's funded status increased to 76.4% from 74.2% over the fiscal year. The funded status is measured by the ratio of actuarial valuation value of assets to actuarial accrued liabilities.
- The net pension liability (NPL) decreased from \$248.5 million to \$203.8 million during fiscal year 2024-25. The fiduciary net position as a percentage of the total pension liability increased from 74.2% to 79.6%.

MCERA Fiduciary Net Position Held in Trust for Pension Benefits

Overview of the Basic Financial Statements

The MD&A serves as an introduction and overview of MCERA’s Basic Financial Statements. The Basic Financial Statements and required disclosures are prepared in accordance with accounting principles and reporting guidelines as set forth by the Governmental Accounting Standards Board (GASB). MCERA’s Basic Financial Statements are comprised of the following:

Statement of Fiduciary Net Position

The Statement of Fiduciary Net Position is a snapshot of account balances at fiscal year-end. It presents major categories of assets and liabilities at fiscal year-end. The difference between assets and liabilities, “Fiduciary Net Position,” represents funds available to pay benefits. Increases and decreases in “Fiduciary Net Position,” when analyzed over time, may serve as an indicator of whether MCERA’s financial position is improving or deteriorating.

Statement of Changes in Fiduciary Net Position

The Statement of Changes in Fiduciary Net Position provides information on the financial activities that increased and decreased Fiduciary Net Position. This statement covers the activity over a one-year period of time.

Notes to the Basic Financial Statements

The Notes to the Basic Financial Statements are an integral part of the basic financial statements and provide background and detailed information regarding MCERA’s policies, programs, and activities.

Required Supplementary Information

The Required Supplementary Information consists of the MD&A and supporting schedules which GASB requires to accompany the basic financial statements. The schedules include the following and can be found on pages 41-46.

- Schedules of Changes in Net Pension Liability and Related Ratios: This schedule displays the 10 year history of the changes in NPL for all participating employers.
- Schedule of Employer Contributions: This schedule provides a 10 year history of the employers' actual contributions compared to the statutory actuarially determined contributions. The schedule also displays the employer contributions as a percentage of covered payroll.
- Schedule of Investment Returns: This table shows the 10 year history of the money-weighted rate of return for investments net of investment management fees.

Other Supplementary Information

The other supplementary information includes schedules pertaining to administrative expenses, information technology expenses, investment management fees and other investment expenses, as well as payments to consultants (other than investment managers). The other supplementary information can be found on pages 47-48.

Financial Analysis

Table #1 below and Table #2 on the following page compare and summarize MCERA's financial activity for the current and prior fiscal year.

Table #1: MCERA Fiduciary Net Position as of June 30, 2025 and 2024

(Dollars in Thousands)	2025	2024	Amount Increase/ (Decrease)	% Change Increase/ (Decrease)
Cash Equivalents	\$ 243	\$ 234	\$ 9	3.85%
Receivables	1,134	957	177	18.50%
Investments, at Fair Value	793,339	715,157	78,182	10.93%
Total Assets	794,716	716,348	78,368	10.94%
Accounts Payable	240	264	(24)	(9.09%)
Accrued Expenses and Other Liabilities	1,036	972	64	6.58%
Total Liabilities	1,276	1,236	40	3.24%
Fiduciary Net Position Restricted for Pension Benefits	\$ 793,440	\$ 715,112	\$ 78,328	10.95%

Table #2: Changes in Fiduciary Net Position for the Fiscal Years Ended June 30, 2025 and 2024

			Amount Increase	% Change Increase
(Dollars in Thousands)	2025	2024	(Decrease)	(Decrease)
Additions				
Employer Contributions	\$ 36,515	\$ 32,096	\$ 4,419	13.77%
Member Contributions	9,422	8,424	998	11.85%
Net Investment Income (Loss)	85,535	61,117	24,418	39.95%

Change in Fiduciary Net Position	78,328	51,203	27,125	52.98%
Fiduciary Net Position Restricted for Pension Benefits at Beginning of Year	715,112	663,909	51,203	7.71%
Fiduciary Net Position Restricted for Pension Benefits at End of Year	\$ 793,440	\$ 715,112	\$ 78,328	10.95%

Additions to Fiduciary Net Position

The primary sources to finance the benefits MCERA provides to its members are accumulated through income on investments and through the collection of employee and employer contributions. These income sources for the fiscal years ended June 30, 2025 and 2024, totaled \$131.5 million and \$101.6 million, respectively. The increase in additions from 2024 to 2025 can be attributed primarily to an increase in net investment income. Employer contributions increased from fiscal year (FY) 2024 as a result of greater safety covered payroll. Member contributions increased in FY 2025 as a result of greater safety and non-safety covered payroll. Total net position increased from approximately \$715.1 million in FY 2024 to \$793.4 million in FY 2025.

Deductions from Fiduciary Net Position

The primary uses of MCERA assets are the payment of benefits to retirees and their beneficiaries, refunds of contributions to terminated employees, and the cost of administering MCERA. These deductions for the fiscal years ended June 30, 2025 and 2024, were \$53.1 million and \$50.4 million, respectively. The primary reason for this change was an increase in benefits paid to retirees.

MCERA Financial Reserves

MCERA's reserves are established from contributions and the accumulation of investment income after satisfying investment and administrative expenses. Under accounting principles generally accepted in the United States of America (GAAP), investments are stated at fair value instead of cost and include the recognition of unrealized gains and losses in the current period. MCERA has adopted a five-year smoothing methodology for investment gains and losses. This has the effect of smoothing both positive and negative fluctuations in investment performance versus assumptions and has a stabilizing effect on contribution rates.

Table #3: MCERA Reserves as of June 30, 2025 and 2024

(Dollars in Thousands)	2025	2024
Member Reserve	\$ 81,624	\$ 76,359
Employer Reserve	(34,247)	(63,978)
Retiree Reserve	365,182	363,488
Cost of Living Reserve	259,628	253,942
Actuarial Transition Reserve	89,715	85,156
Deferred Return Reserve	31,538	145
Total Reserves	\$ 793,440	\$ 715,112

Major Initiatives and Significant Events

Several major initiatives were undertaken during the fiscal year including:

- MCERA received a Compliance Statement, dated September 9, 2024, from the Internal Revenue Service (IRS) agreeing to the corrective actions and changes in administrative procedures in MCERA's IRS Voluntary Compliance Program (VCP) application. The corrections required by the VCP were completed in June 2025, bringing the VCP application to a successful close.
- The Board adopted new Succession Planning, and Service Provider Evaluation Policies.
- In February 2025, MCERA processed its first Domestic Relations Order Separate Account benefit.
- In furtherance of Strategic Plan objectives, the Board adopted a formalized New Trustee Orientation program and established an Agreed-Upon Procedures (AUP) audit program. The two year AUP program commences on July 1, 2025.
- The Board negotiated an agreement with the County of Mendocino and the labor union to use five California County retirement systems as market comparator agencies for MCERA staff, added a dedicated Retirement Accountant position, and adopted Government Code Section 31522.2, designating the Retirement Financial Investment Officer's employment as at the will of the Board of Retirement.
- MCERA continued the investment portfolio structure review begun last year, deciding to change the international equity structure to mirror the domestic equity structure. The Board hired three new investment managers: a passive index and two active managers.
- Completed building accessibility upgrades on the 625 Kings Court asset.
- The Board saw the elected Auditor-Controller/Treasurer-Tax Collector refill the 1st seat, while the Board of Supervisors appointee filled the 5th seat.

Investment and Economic Summary

In accordance with state constitutional mandates, the Board adopts a strategic asset allocation policy designed to ensure diversification among asset classes and achieve MCERA's long-term investment objectives. Although MCERA invests on a long-term horizon, short-term returns are important to discern developing trends.

The time-weighted investment return for the fiscal year ending June 30, 2025, was 12.33%, which was greater than the benchmark by 0.45%. Performance returns were 10.00%, 9.64%, 7.85%, and 7.72% for the three-, five-, seven- and ten-year periods ending June 30, 2025, respectively. A time-weighted rate of return negates the effects of cashflows into and out of an investment.

The rate of return on MCERA's investment portfolio is an integral component of the annual additions to the pension plan as total investment income is typically the largest contributor to MCERA's annual additions to fiduciary net position.

Funded Status and Actuarial Reporting

MCERA maintains a funding goal to establish contributions that fully fund MCERA's liabilities, and that, as a percentage of payroll, remain as level as possible for each generation of active members. Actuarial valuations are performed annually with actuarial experience investigations conducted triennially in accordance with state statute. The use of realistic assumptions is important in maintaining the necessary funding to pay promised benefits. Each year the actual experience of MCERA is compared to our assumptions and the differences are studied to determine whether changes in the contribution requirements are necessary. In addition, triennially, an actuarial experience investigation is undertaken to review the actuarial assumptions and compare the actual experience during the preceding three-year period with that expected under those assumptions.

In the June 30, 2025 valuation, the ratio of actuarial valuation value of assets to the actuarial accrued liabilities was 76.4%, which was an increase from the prior year's valuation funded ratio of 74.2%. The actuarial valuation value of assets excludes about \$31.5 million in deferred market gains that will be smoothed in over the next few years. Thus, on a fair value of assets basis, the funded ratio would be 79.6%. MCERA's unfunded actuarial accrued liability (UAAL) on a valuation value of assets as of June 30, 2025, was \$234.9 million. On a fair value of assets basis, the UAAL would be \$203.4 million.

Prior to July 1, 2012, the total UAAL was being amortized on a 30-year decreasing period, with 27 years remaining as of June 30, 2012. On December 15, 2021, the Board reduced the amortization period for the 2012 UAAL restart layer by 3 years, from 18 years remaining as of June 30, 2021 to 15 years (11 years as of June 30, 2025).

The aggregate employer rate calculated in the June 30, 2025 valuation decreased from 41.29% of payroll to 40.27% of payroll. The decrease was driven by the amortizing the prior year's UAAL over a larger than expected projected total payroll and investment returns greater than expected after asset smoothing. These gains were partially offset by individual salary increases greater than expected and other net experience losses. The aggregate member rate calculated in the June 30, 2025 valuation decreased from 10.32% of payroll to 10.28% of payroll.

Request for Information

The financial report is designed to provide the MCERA Board of Retirement, our membership, taxpayers, investment managers, and creditors with a general overview of MCERA finances and to account for the money it receives. Questions concerning any of the information in this report or requests for additional financial information should be addressed to Mendocino County Employees' Retirement Association, 625-B Kings Court, Ukiah, California 95482.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Doris L. Rentschler". The signature is fluid and cursive, with the first name "Doris" and last name "Rentschler" clearly legible.

Doris L. Rentschler, CFP
Executive Director

The accompanying notes to the basic financial statements are an integral part of this statement

Notes to the Basic Financial Statements

For the Fiscal Year Ended June 30, 2025

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Reporting Entity:

Mendocino County Employees' Retirement Association (MCERA or the Plan) is governed by the Board of Retirement (Board) and is considered an independent entity. MCERA is a component unit of the County of Mendocino (the County) and is being reported as a Pension Trust Fund in the County's Financial Report in accordance with Governmental Accounting Standards Board (GASB) Statements No. 14; No. 39, as amended by GASB Statement No. 61; and No. 80.

Basis of Accounting:

MCERA follows GASB accounting principles and reporting guidelines, and basic financial statements are prepared using the accrual basis of accounting. MCERA member contributions are recognized in the period in which the contributions are due. Employer contributions to MCERA are recognized when due and when the employer has made a formal commitment to provide the contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of MCERA.

Comparative Data:

The accompanying financial statements include summarized information from the prior year financial statements for comparative purposes only. Such information does not include sufficient detail to constitute a presentation in accordance with accounting principles generally accepted in the United States of America. Such information should be read in conjunction with MCERA's basic financial statements for the fiscal year ended June 30, 2023, from which the summarized information was derived.

Use of Estimates:

The preparation of basic financial statements in conformity with accounting principles generally accepted in the United States of America requires the Executive Director to make estimates and assumptions that affect the amounts reported in the basic financial statements and accompanying notes. Actual results could differ from these estimates.

Valuation of Investments:

Investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Investments that do not have an established market are reported at estimated fair value. Security transactions are accounted for on a trade date basis. Interest income is recognized when earned, and dividend income is recognized on the ex-dividend date. Stock dividends or stock splits are recorded as memo items and do not affect the total value of the securities. Purchases and sales of securities are accounted for on a trade date basis, and dividends declared but not received are accrued on the ex-dividend date. Unrealized gains and losses on investments are reported as net appreciation (depreciation) in fair value of investments.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**Valuation of Investments (Continued):**

The calculation of realized gains and losses is independent of the calculation of net appreciation (depreciation) in the fair value of MCERA investments.

Derivatives:

MCERA's Investment Policy permits the use of derivative instruments to minimize the exposure of certain investments to adverse fluctuations in financial and currency markets and to enhance yields. MCERA does not use derivatives for speculative use or to create leverage.

During the fiscal year ended June 30, 2025, MCERA owned no derivatives directly in its portfolio.

Custodial Credit Risk:

Custodial credit risk for deposits in the County trust account is assumed by the County. Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, MCERA would not be able to recover the value of the investment or collateral securities that are in possession of an outside party. Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in MCERA's name, and held by the counterparty. MCERA's investment securities are not exposed to custodial credit risk because all securities are either held by MCERA's custodial bank in MCERA's account or held directly with investment companies in MCERA's name.

MCERA's custodial bank maintains insurance to help protect against losses due to negligence, theft, and other related events.

Except for a statement that the duties of the Board of Retirement, MCERA officers, and employees shall be discharged with care, skill, prudence, and diligence, MCERA has no formal policy for managing custodial credit risk.

Market and Credit Risk:

MCERA invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and that such changes could materially affect account balances and the amounts reported in the Statement of Fiduciary Net Position and the Statement of Changes in Fiduciary Net Position.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**Market and Credit Risk (Continued):**

Credit risk is the risk that an issuer or other counterparty to a debt instrument will not fulfill its obligations. This is measured by the assignment of ratings by nationally recognized statistical rating organizations. Investment allocation guidelines according to the Investment Policy are as follows:

Asset Class	Allowable Range	Current Allocation
Domestic Equities	32% - 42%	37.55%
International Equities	20% - 30%	25.73%
Domestic Fixed Income	18% - 24%	20.16%
Real Estate Partnerships	6% - 16%	9.12%
Infrastructure	1% - 11%	7.44%

MCERA's Investment Policy does not allow for a single investment in real estate that is in excess of 5 percent of total assets at the time of purchase. With respect to common stocks, MCERA has a goal of diversifying the portfolio across a broad spectrum of sectors and geographies that have sound long-term growth potential. Similar restrictions apply to fixed income securities. Although MCERA does not have a specific policy to limit credit risk, MCERA seeks to mitigate risk through its Investment Policy constraints.

Interest Rate Risk:

Interest rate risk is the risk that changes in the interest rate will adversely affect the fair value of an investment. MCERA has not adopted a specific formal policy to manage interest rate risk. Nevertheless, MCERA's U.S. active bond funds are generally managed with duration limits to reduce interest rate risk. The quality and interest rate risk of MCERA's fixed income funds are summarized in the table below.

Commingled Fixed Income Funds:

Fund Name	Fair Value	Weighted Average Coupon	Weighted Average Maturity (Years)	Effective Duration (Years)	Weighted Average Quality Rating
Dodge & Cox Income	\$ 79,659,661	4.32%	9.32	6.25	AA-
PIMCO Total Return	\$ 80,316,376	3.96%	9.45	6.60	AA-
Total	\$ 159,976,037	4.14%	9.39	6.43	AA-

Foreign Currency Risk:

Foreign currency risk is the risk that changes in the exchange rates will adversely affect the fair value of an investment or deposit. International portfolio managers are permitted to use defensive currency hedging to mitigate foreign currency risk through the use of forward currency contracts and currency futures as long as they are implemented in a timely and cost-effective manner. MCERA's international portfolio managers are allowed to invest in authorized countries. MCERA owns commingled investment vehicles and does not have direct exposure to foreign currency risk. Although MCERA does not have a specific policy regarding foreign currency risk, MCERA seeks to mitigate this risk through its Investment Policy constraints.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)**Investment Concentrations:**

As of June 30, 2025, MCERA does not hold investments in any one organization that represent 5 percent or more of MCERA's fiduciary net position.

Money-Weighted Rate of Return:

For the fiscal year ended June 30, 2025, the annual money-weighted rate of return on MCERA investments, net of investment management expense, was 12.25%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

Risk Management:

MCERA is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; natural disasters; and major downturns in financial markets. For the past several years, MCERA has obtained coverage from commercial insurance companies for errors and omissions coverage related to activities of the Board, but all other risks of loss, except losses due to depreciation in the fair value of investments, are assumed by the sponsoring employers. MCERA has effectively managed risk through various employee education and prevention programs and careful selection of investments. In addition, MCERA is also covered by the County's self-insurance program for general liability, unemployment, and workers' compensation coverage. The County's self-insurance program also includes a premium for excess coverage. Expenditures and claims are recognized when it is probable that a loss has occurred, and the amount of the loss can be reasonably estimated.

Income Taxes:

MCERA qualifies under Section 401(a) of the Internal Revenue Code (IRC). No provision for income taxes has been made in the accompanying basic financial statements, as MCERA is exempt from federal and state income taxes under the provisions of the IRC Section 501 and California Revenue and Taxation Code Section 23701, respectively. MCERA obtained its latest determination letter dated August 11, 2016, in which the Internal Revenue Service (IRS) stated that MCERA, as then designed, is in compliance with the applicable requirements of the IRC.

MCERA discovered operational errors related to Plan interpretations. To mitigate the potential risk of MCERA losing tax qualification as a result of operational errors, MCERA filed for corrective action under the IRS Voluntary Correction Program (VCP). In accordance with the IRS Employee Plans Compliance Resolution System (EPCRS), MCERA is allowed to voluntarily correct any mistakes and avoid any potential adverse consequence. On September 9, 2024, the IRS approved MCERA's VCP application and issued a compliance statement.

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Administrative Expenses:

The Board approves MCERA's annual budget. The County Employees Retirement Law of 1937 (CERL) limits MCERA's annual administrative expenses, excluding the costs of administration for computer software and hardware and computer technology consulting services (IT costs), to twenty-one hundredths of one percent (0.21%) of MCERA's actuarial accrued liability or \$2 million adjusted for inflation, whichever is greater. The Board's policy is that administrative expenses incurred in any year will not exceed twenty-one hundredths of one percent (0.21%) of MCERA's actuarial accrued liability, unless authorized by a separate vote of the Board.

MCERA's actual administrative expense, excluding IT costs, for fiscal year 2024-25 was \$1,285,122, which represented 0.14% of MCERA's actuarial accrued liability.

Subsequent Events:

In compliance with governmental accounting standards generally accepted in the United States of America, management has evaluated events that have occurred after year-end through the date the financial statements were issued December 8, 2025 to determine if these events are required to be disclosed in these financial statements.

On July 20, 2022, MCERA filed an updated VCP application seeking approval to conform its Plan document to its past practices as the correction method to fully resolve several past failures relating to service purchases. On October 16, 2024, MCERA received an IRS compliance statement, dated September 9, 2024, requiring all corrections be completed within 150 days. On March 3, 2025, MCERA received an extension to July 6, 2025, to complete the remaining corrections. MCERA completed the last of the corrections in June 2025, bringing the correction project to a successful close. There is one appeal of correction pending before the Board.

NOTE 2 – DESCRIPTION OF PLAN**Description of Plan and Applicable Provisions of the Law:**

MCERA is an integrated public retirement system established under and subject to the legislative authority of the State of California as enacted and amended by the CERL (Chapter 677 Statutes of 1937). MCERA is a multiple-employer cost-sharing defined benefit plan for the County, the County Courts, and the Russian River Cemetery District (the Plan Sponsors). MCERA was approved by the Board of Supervisors to become effective January 1, 1948, and was integrated with Social Security on January 1, 1956.

Membership in the Plan at June 30, 2025, consisted of the following:

Retirees and beneficiaries receiving benefits	1,734
Terminated plan members entitled to, but not yet receiving, benefits	897
Active plan members	1,094
Total	3,725
Number of participating employers	3

A multiple-employer cost-sharing plan is a single plan with pooling (cost-sharing) arrangements for the participating employers. All risks, rewards, and costs, including benefit costs, are shared and are not attributed individually to the employers. A single actuarial valuation covers all plan members. Other special districts within the County are eligible, but have not elected to participate.

All permanent employees who work at least 32 hours per week become members of the Plan on the first day of the second pay period following employment. Employees are classified as either General or Safety (Law Enforcement or Probation) members, and are assigned to one of five tiers based on entry date and job classification. Members become vested after five years of credited service.

Retirement benefits offered by the Plan include normal retirement, disability retirement, and service-connected disability retirement. Retirement benefits are based on the years of service, final average salary, and age at retirement. A statutory benefit formula that varies based on a member's tier and type is used to determine monthly benefits. A death benefit is available to beneficiaries. An annual cost of living adjustment of no more than 3 percent may be granted by the Board. The annual cost of living benefit is based upon the tier level of the member. Members hired after January 1, 2013, are not eligible for a cost of living benefit.

The Plan does not provide health benefits to members. Based on County Board of Supervisors Resolution No. 98-147, County Counsel concluded that the County Board of Supervisors was ultimately responsible for dealing with any retiree health benefits that might be provided to retired employees of the County.

NOTE 2 – DESCRIPTION OF PLAN (Continued)

Member Termination:

Upon separation from MCERA, members' accumulated contributions are refundable with interest accrued through the prior June 30 or December 31. Interest on member accounts is credited semiannually on June 30 and December 31. Withdrawal of such accumulated contributions results in forfeiture of the related vested benefits.

Plan Termination:

MCERA is administered in accordance with the provisions of California Government Code Section 31450 and accompanying code sections. California Government Code Section 31483 allows the governing body of the County, the County Courts, or special district, through the adoption of an ordinance or resolution, to terminate the applicability of the Plan to employees of the County, the County Courts, or special district whose services commence after a given future date.

NOTE 3 – CASH AND INVESTMENTS

Cash and investments are reported at fair value. Cash and investments that do not have an established market are reported at estimated fair value. All investments listed in the Statement of Fiduciary Net Position, except for real estate and cash equivalents, are registered securities held by MCERA's agent in MCERA's name. The Board has exclusive control over all cash and investments of MCERA and is responsible for establishing investment objectives, strategies, and policies.

The Board has adopted an Investment Policy, which provides the framework for the management of MCERA's investments. The Investment Policy establishes MCERA's investment objectives and defines the principal duties of the Board and the investment managers. The asset allocation plan is an integral part of the Investment Policy and is designed to provide an optimum and diversified mix of asset classes with return expectations to satisfy expected liabilities while managing risk exposure. MCERA currently employs investment managers to manage its assets subject to the provisions of the Investment Policy.

Cash equivalents consist of cash in trust with the Treasurer of the County. Cash from deposits and cash needed for daily operational purposes is held in a pooled account with other County funds. The County Treasurer is responsible for the management, control, and safekeeping of all investments in the pooled fund. Interest on funds in the County investment pool is computed quarterly based on average daily balance. A deposit in the pooled account approximates fair value and may be subject to credit risk, concentration risk, and custodial credit risk.

NOTE 3 – CASH AND INVESTMENTS (Continued)

MCERA's cash and investments stated at fair value as of June 30, 2025, are as follows:

Cash equivalents	\$ 242,743
Total cash equivalents	242,743
Fixed income	159,976,037
International equities	204,141,003
Domestic equities – small cap	42,854,203
Domestic equities – mid cap	43,329,539
Domestic equities – large cap	211,696,675
Real estate partnerships	70,864,547
Infrastructure	59,017,528
Real estate – 625 Kings Court, Ukiah, CA	1,460,000
Total investments, at fair value	793,339,532
Total Cash and Investments	\$ 793,582,275

NOTE 4 – FAIR VALUE MEASUREMENT OF INVESTMENTS

MCERA follows GASB Statement No. 72, *Fair Value Measurement and Application* (GASB 72), which establishes a fair value hierarchy based on three types of input to develop the fair value measurements for investments. The hierarchy gives the highest priority to Level 1 inputs which are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; and Level 3 inputs are significant unobservable inputs. The three levels of the fair value hierarchy under GASB 72 are described below.

Level 1:

Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that MCERA has the ability to access.

Level 2:

Inputs to the valuation methodology include: quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

NOTE 4 – FAIR VALUE MEASUREMENT OF INVESTMENTS (Continued)**Level 3:**

Inputs to the valuation methodology are unobservable and significant to the fair value measurement. The inputs into the determination of fair value are based upon the best information in the circumstances and may require management judgment or estimation.

The asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

The following is a description of the valuation methodologies used for investments measured at fair value.

Commingled funds: Valued at the fair value of shares held by MCERA at fiscal year-end.

Certain investments which do not have a readily determinable fair value have been valued at the Net Asset Value (NAV) per share (or its equivalent) provided that the NAV is calculated and used as a practical expedient to estimate fair value in accordance with accounting principles generally accepted in the United States of America (GAAP) requirements. These investments are not categorized within the fair value hierarchy but disclosed in the schedule of investments measured at the NAV.

Real estate partnerships: Valued at the NAV of shares held by MCERA at fiscal year-end.

Real estate – 625 Kings Court, Ukiah, CA: Valued at the approximate fair value obtained through a real estate appraisal.

Infrastructure: Valued at the NAV of shares held by MCERA at fiscal year-end.

The methods described above may produce a fair value calculation that may not be as indicative of net realizable value or reflective of future fair values. Furthermore, while MCERA believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

NOTE 4 – FAIR VALUE MEASUREMENT OF INVESTMENTS (Continued)

The following tables set forth by level, within the fair value hierarchy, MCERA's investments at fair value and the NAV as of June 30, 2025:

	Level 1	Level 2	Level 3	Total
Investments by fair value level:				
Commingled funds:				
Fixed income	\$ -	\$ 159,976,037	\$ -	\$ 159,976,037
International equities	192,863,325	11,277,678	-	204,141,003
Domestic equities	297,880,418	-	-	297,880,418
Real estate - Kings Court	-	-	1,460,000	1,460,000
Total investments by fair value level	\$ 502,021,421	\$ 159,976,037	\$ 1,460,000	
Investments measured at the NAV:				663,457,458
Real estate partnerships				70,864,546
Infrastructure				59,017,528
Total investments measured at the NAV				129,882,074
Total investments measured at fair value level and NAV				\$ 793,339,532

The valuation method for investments measured at the NAV per share (or its equivalent) is presented on the following table:

	Investments Measured at NAV as of June 30, 2025			
	Fair Value	Unfunded Commitments	Redemption Frequency	Redemption Notice Period
Real estate partnerships ⁽¹⁾	\$ 70,864,546	\$ -	Quarterly	45 Days
Infrastructure	59,017,528	-	Quarterly	90 Days
Total investments measured at the NAV	\$ 129,882,074			

- (1) These are two real estate funds. They are real estate funds that invest primarily in a diversified portfolio of institutional quality multi-family, industrial, retail, and office assets in the United States. The fair values of the investments in this type have been determined using the NAV (or its equivalent) of MCERA's ownership interest in partners' capital.

NOTE 4 – FAIR VALUE MEASUREMENT OF INVESTMENTS (Continued)

The following table sets forth a summary of changes in the fair value of MCERA’s Level 3 investments for the fiscal year ended June 30, 2025, as follows:

Commercial Building at 625 Kings Court, Ukiah, California	
	2025
Fair value, beginning of year	\$1,347,000
Unrealized gain (loss)	113,000
Purchases	-
Sales	-
Issuances	-
Settlements	-
Fair value, end of year	\$1,460,000
Amount of total gains or losses for the period included in net appreciation in fair value of investments, attributable to the change in unrealized gains or losses relating to assets still held as of June 30, 2025.	\$113,000

The following table represents MCERA’s Level 3 financial instruments and the valuation techniques used to measure the fair value of those financial instruments as of June 30, 2025. A professional appraisal was completed in July 2025. MCERA’s policy is to obtain a professional appraisal every four years.

Instrument	Fair Value at June 30, 2025	Principal Valuation Technique
Real Estate - 625 Kings Court, Ukiah, CA	\$ 1,460,000	Fair Value = Real Estate Appraisal

NOTE 5 – CONTRIBUTIONS

Contribution rates for the employers and their participating employees are established and may be amended by the MCERA Board (and then shall be adopted by the County Board of Supervisors). The contribution rates are determined based on the benefit structure established by the employers. The Actuarial Valuation and Review report issued by The Segal Company as of June 30, 2023, which was adopted by the MCERA Board, recommended employer and member contribution rates that aggregate to 40.26% and 10.52%, respectively. The actual member and employer rates depend on General, Safety, or Probation membership, and tier. The member and employer contribution rates are adjusted annually to maintain the appropriate funding status of MCERA. The employer contribution rate is actuarially determined to provide for the balance of the contributions needed to fund the annual normal cost (basic and cost of living) and the amortization of the unfunded actuarial accrued liability (UAAL).

NOTE 5 – CONTRIBUTIONS (Continued)

Using the projected payroll amounts for MCERA's membership groups and tiers that were used in the June 30, 2023 actuarial valuation, management has estimated the contributions are comprised of the following for the fiscal year ended June 30, 2025:

Estimated Employer Normal Cost Contributions	\$ 11,137,615
Estimated UAAL Contributions	25,377,073
Total	\$ 36,514,688

NOTE 6 – NET PENSION LIABILITY

GASB Statement No. 67 requires public pension plans to provide a net pension liability. The net pension liability is measured as the total pension liability less the amount of MCERA's fiduciary net position. The net pension liability is an accounting measurement for financial statement reporting purposes. The components of MCERA's net pension liability at June 30, 2025, were as follows:

Total pension liability	\$ 997,201,576
Fiduciary net position	793,440,285
Net pension liability	\$ 203,761,291
Fiduciary net position as a percentage of total pension liability	79.6%

Disclosure of Information About Actuarial Methods and Assumptions:

The required Schedules of Changes in Net Pension Liability and Related Ratios immediately following the Notes to the Basic Financial Statements presents information about whether the fiduciary net position is increasing or decreasing over time relative to the total pension liability.

The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations.

Actuarial Methods and Assumptions:

The total pension liability as of June 30, 2025, was determined by actuarial valuation as of June 30, 2025. The actuarial assumptions used in the June 30, 2025 valuation were based on the results of an experience study for the period from July 1, 2019 through June 30, 2022. Key methods and assumptions used in the latest actuarial valuation are presented below:

NOTE 6 – NET PENSION LIABILITY (Continued)**Actuarial Methods and Assumptions (Continued):**

Valuation date	June 30, 2025
Actuarial cost method	Entry age cost method (individual basis)
Amortization method	Level % of payroll for total unfunded liability
Remaining amortization period (1)	11 years (closed) for all UAAL
Asset valuation method	Fair value of assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual market return adjusted for investment expenses only and the expected return on the fair value, and is recognized over a five year period, further adjusted, if necessary, to be within 25% of the fair value. The valuation value of assets is the actuarial value of assets reduced by the value of the non-valuation reserves.

Actuarial assumptions:

Investment rate of return	6.50%
Inflation rate	2.50%
Real across-the-board salary increase	0.50%
Projected salary increases *	4.00% to 8.00% for General
	4.00% to 8.25% for Safety & Probation
* Includes inflation at	2.50% plus real across-the-board salary increase of 0.50% plus merit and longevity increases.
Cost of living adjustments	2.75% of retirement income

- (1) The current amortization is a layered amortization. Prior to July 1, 2012, the total UAAL was being amortized on a 30-year decreasing period, with 27 years remaining as of June 30, 2012. On December 15, 2021 the Board reduced the amortization period for the 2012 UAAL restart layer by 3 years, from 18 years remaining as of June 30, 2021 to 15 years (11 years as of June 30, 2025). On or after July 1, 2012, and new UAAL resulting from plan amendments are amortized over separate decreasing 15-year periods; early retirement incentive programs (ERIPs) are amortized over separate decreasing 5-year periods; assumption and method changes are amortized over separate decreasing 18-year periods; and experience gains/losses are also amortized over separate decreasing 18-year periods.

NOTE 6 – NET PENSION LIABILITY (Continued)**Actuarial Methods and Assumptions (Continued):**

Mortality for healthy members and all beneficiaries	General Members: Pub-2010 General Healthy Retiree Amount-Weighted Mortality Table (separate tables for males and females), with rates decreased by 5% for males and increased 5% for females, projected generationally with the two-dimensional mortality improvement scale MP-2021. Safety and Probation Members: Pub-2010 Safety Healthy Retiree Amount-Weighted Mortality Table (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2021. Beneficiaries not currently in Pay Status: Pub-2010 General Healthy Retiree Amount-Weighted Mortality Tables (separate tables for males and females) with rates decreased by 5% for males and increased by 5% for females, projected generationally with the two-dimensional mortality improvement scale MP-2021. Beneficiaries currently in Pay Status: Pub-2010 Contingent Survivor Amount-Weighted Mortality Tables (separate tables for males and females) with rates increased by 5%, projected generationally with the two-dimensional mortality improvement scale MP-2021.
Years of life expectancy after disability	General Members: Pub-2010 Non-Safety Disabled Retiree Amount-Weighted Mortality Table (separate tables for males and females), with rates decreased by 5%, projected generationally with the two-dimensional mortality improvement scale MP-2021. Safety and Probation Members: Pub-2010 Safety Disabled Retiree Amount-Weighted Mortality Table (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2021.
Life expectancy after retirement for employee contribution rate purposes	General members: Pub-2010 General Healthy Retiree Amount-Weighted Mortality Tables (separate tables for males and females) with rates decreased by 5% for males and increased by 5% for females, projected 30 years (from 2010) with the two-dimensional mortality improvement scale MP-2021, weighted 30% male and 70% female.
	Safety and Probation members: Pub-2010 Safety Healthy Retiree Amount-Weighted Mortality Tables (separate tables for males and females), projected 30 years (from 2010) with the two-dimensional mortality improvement scale MP-2021, weighted 80% male and 20% female.

NOTE 6 – NET PENSION LIABILITY (Continued)**Assumed Asset Allocation:**

The long-term expected rate of return on pension plan investments is determined using a building-block method in which expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class for the June 30, 2025 valuation. These returns are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and adding expected inflation and subtracting expected investment expenses and a risk margin.

The target allocation and projected arithmetic real rates of return for each major asset class, after deducting inflation, but before deducting investment expenses, used in the derivation of the long-term expected investment rate of return assumption are summarized in the following tables:

	Target Allocation	Long-Term Expected Arithmetic Real Rate of Return
Domestic Equities - Large Cap	25.90%	6.00%
Domestic Equities - Small Cap	11.10%	6.65%
International Equities	25.00%	7.05%
Domestic Fixed Income	21.00%	1.97%
Real Estate Partnerships	11.00%	3.86%
Infrastructure	6.00%	4.65%
Total	100.00%	5.17%

Discount Rate:

The discount rate used to measure the total pension liability was 6.50% as of June 30, 2025. The projection of cash flows used to determine the discount rate assumed plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the actuarially determined contribution rates. For this purpose, only employee and employer contributions that are intended to fund benefits of current plan members and their beneficiaries are included. Projected employer contributions that are intended to fund the service costs of future plan members and their beneficiaries, as well as projected contributions from future plan members, are not included. Based on those assumptions, MCERA's Fiduciary Net Position was projected to be available to make all projected future benefit payments for current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability as of June 30, 2025.

NOTE 6 – NET PENSION LIABILITY (Continued)**Sensitivity of the Net Pension Liability to Changes in the Discount Rate:**

The following presents the net pension liability of MCERA as of June 30, 2025, calculated using the discount rate of 6.50%, as well as what MCERA's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.50%) or 1-percentage-point higher (7.50%) than the current rate:

	1% Decrease (5.50%)	Current Discount (6.50%)	1% Increase (7.50%)
Net pension liability	\$ 332,847,103	\$ 203,761,291	\$ 97,451,523

NOTE 7 – RESERVES

Member and employer contributions are allocated to various legally required reserve accounts based on actuarial determinations. Descriptions of the purpose for the reserve and designated accounts are provided below

Member reserve represents the balance of member contributions. Additions include member contributions and interest earnings. Deductions include refunds of member contributions and transfers to retiree reserves.

Employer reserve represents the balance of employer contributions for future retirement payments to current active members. Additions include contributions from the employer and interest earnings. Deductions include transfers to retiree reserves, lump sum death benefits, and payments under California Government Code Sections 31725.5 and 31725.6 related to alternative employment for members otherwise entitled to disability retirement benefits.

Retiree reserve represents the balance of transfers from member reserves, employer reserves, and interest earnings, less payments to retirees, and payments to beneficiaries of retired members who are deceased.

Actuarial transition reserve represents the accumulated difference between the Actuarial Value of Assets and the book or cost value of reserves on July 1, 2023. This is a one-time adjustment to align the reserve balances with the Actuarial Value of Assets.

Negative interest reserve represents the amount of interest credited to the reserve accounts that has not been paid for out of earnings of the fund.

Total allocated reserves and designations represent the smoothed actuarial value of assets (the fair value of assets less the unrecognized/deferred gains and losses) and is the sum of the preceding reserves.

Deferred return reserve represents the unrecognized/deferred gains and losses and is the difference between the smoothed actuarial value of assets and the net position restricted for pension benefits at fair value.

NOTE 7 – RESERVES (Continued)

A summary of the various reserve accounts, which comprise net position for pension and other benefits at June 30, 2025, is as follows:

Member reserve	\$ 81,623,882
Employer reserve	(34,247,147)
Retiree reserve	624,810,350
Actuarial transition reserve	89,715,079
Total allocated reserves and designations	761,902,164
Deferred return reserve	31,538,121
Fiduciary net position restricted for pension benefits	\$ 793,440,285

Fiduciary net position as a % of the total pension liability	79.6%	74.2%	71.6%	71.3%	84.9%
Covered payroll ²	\$ 89,732,027	\$ 87,186,296	\$ 85,729,491	\$ 81,780,476	\$ 77,319,043
Net pension liability as a % of covered payroll	227.1%	285.0%	306.9%	305.7%	160.3%

¹ The service cost is based on the previous year's valuation, meaning the 2025 and 2024 values are based on the valuations as of June 30, 2024, and June 30, 2023, respectively. Both service costs have been calculated using the assumptions shown in Note 6 to the basic financial statements.

² Covered payroll represents Compensation Earnable and Pensionable Compensation and is defined as the payroll on which contributions to the pension plan are based.

³ We have reflected the reduction in retiree and beneficiary benefits under the Alameda Decision, and corrections under the Voluntary Correction Program as experience gains and losses rather than as a plan amendment for the reasons discussed on page 5 and 6 of the June 30, 2022 GASB 67 report.

6/30/21	26,334	26,334	-	77,319	34%	34%
6/30/22	30,485	30,485	-	81,780	37%	37%
6/30/23	30,309	30,309	-	85,729	35%	35%
6/30/24	32,096	32,096	-	87,186	37%	37%
6/30/25	36,515	36,515	-	89,732	41%	41%

¹ This amount includes additional UAAL contributions made by the Mendocino County Superior Court and the Russian River Cemetery District in FY 2018/2019 based on the minimum dollar UAAL amortization amount for FY 2017/2018. The Mendocino County Superior Court and the Russian River Cemetery District had paid \$31,588 and \$5,949 less than the minimum UAAL contributions in FY 2017/2018, respectively.

Schedule of Investment Returns

Schedule of Investment Returns

Fiscal Year	Annual Money-Weighted Rate of Return, Net of Investment Management Fees
2016	(2.19)%
2017	16.10%
2018	9.63%
2019	4.00%
2020	2.97%
2021	31.40%
2022	(9.73)%
2023	8.32%
2024	10.17%
2025	12.25%

Notes to Required Supplementary Information

NOTE 1 – SCHEDULE OF CHANGES IN NET PENSION LIABILITY AND RELATED RATIOS

The total pension liability contained in this schedule was obtained from Mendocino County Employees' Retirement Association (MCERA)'s actuary, The Segal Group.

The service cost is based on the previous year's valuation, meaning the 2025 and 2024 values are based on the valuations as of June 30, 2024 and June 30, 2023, respectively. The actuarial assumptions are described in Note 3 below.

Covered payroll shown represents Compensation Earnable and Pensionable Compensation. Only Compensation Earnable and Pensionable Compensation that would go into the determination of retirement benefits are included.

Change in Assumptions

Triennially, MCERA requests the actuary perform an analysis of all economic and non-economic assumptions in the form of an Experience Study. The most recent triennial analysis was performed as of June 30, 2023, for the period of July 1, 2019 through June 30, 2022. Based on the results of this study, the Board of Retirement adopted new economic assumptions effective with the June 30, 2023 valuation. These key methods and assumption changes included adjusting the investment return from 6.75% to 6.50%; adjusting inflation from 2.75% to 2.50%; and mortality rate table changes. See Note 6 in the notes to the basic financial statements for details on the current actuarial methods and assumptions used in the June 30, 2025 actuarial valuation.

NOTE 2 – SCHEDULE OF INVESTMENT RETURNS

The money-weighted return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

NOTE 3 – ACTUARIAL ASSUMPTIONS USED IN DETERMINING THE ACTUARIALLY DETERMINED CONTRIBUTIONS

The actuarial determined contribution rates for the fiscal year ended June 30, 2025, are calculated based on the June 30, 2023 actuarial valuation (two years prior to the end of the fiscal year in which contributions are reported). Details of the actuarial methods and assumptions used for the valuation are as follows:

Valuation date	June 30, 2023
Actuarial cost method	Entry age cost method (individual basis)
Amortization method	Level % of payroll for total unfunded liability
Remaining amortization period	13 years (closed) for all unfunded actuarial accrued liability (UAAL) remaining as of June 30, 2023

NOTE 3 – ACTUARIAL ASSUMPTIONS USED IN DETERMINING THE ACTUARIALLY DETERMINED CONTRIBUTIONS (Continued)

Asset valuation method	Fair value of assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual market return and the expected return on the fair value, and is recognized over a five year period, further adjusted, if necessary, to be within 25% of the fair value. The valuation value of assets is the actuarial value of assets reduced by the value of the non-valuation reserves.
Actuarial assumptions:	
Investment rate of return	6.50% for 2023
Inflation rate	2.50% for 2023
Real across-the-board salary increase	0.50%
Projected salary increases*	General: 4.00% to 8.00% for 2023 Safety and Probation: 4.00% to 8.25% for 2023
*Includes inflation at	2.50% for 2023 plus real across-the-board salary increase of 0.50% plus merit and longevity increases.
Cost of living adjustments	2.75% for 2023 of retirement income
Mortality for healthy members and all beneficiaries	General Members: Pub-2010 General Healthy Retiree Amount-Weighted Mortality Tables with rates decreased by 5% for males and increased by 5% for females, projected generationally with the two-dimensional mortality improvement scale MP-2021. Safety and Probation Members: Pub-2010 Safety Healthy Retiree Amount-Weight Mortality Tables, projected generationally with the two-dimensional mortality improvement scale MP-2021. All Beneficiaries: Pub-2010 Contingent Survivor Amount-Weighted Mortality Tables with rates increased by 5%, projected generationally with the two-dimensional mortality improvement scale MP-2021.

NOTE 3 – ACTUARIAL ASSUMPTIONS USED IN DETERMINING THE ACTUARIALLY DETERMINED CONTRIBUTIONS (Continued)

Years of life expectancy after disability	General Members: Pub-2010 Non-Safety Disabled Retiree Amount-Weighted Mortality Tables, with rates decreased by 5%, projected generationally with the two-dimensional mortality improvement scale MP-2021. Safety and Probation Members: Pub-2010 Safety Disabled Retiree Amount-Weighted Mortality Tables, projected generationally with the two-dimensional mortality improvement scale MP-2021.
Life expectancy after retirement for employee contribution rate purposes	General Members: Pub-2010 General Healthy Retiree Amount-Weighted Mortality Tables with rates decreased by 5% for males and increased by 5% for females, projected 30 years (from 2010) with the two-dimensional mortality improvement scale MP-2021, weighted 30% male and 70% female. Safety and Probation Members: Pub-2010 Safety Healthy Retiree Amount-Weighted Mortality Tables, projected 30 years (from 2010) with the two-dimensional mortality improvement scale MP-2021, weighted 80% male and 20% female.

Other Supplementary Information

Schedule of Investment Management Fees and Other Investment Expenses

For the Fiscal Year Ended June 30, 2025

Investment Management Fees	Direct ⁽¹⁾	Indirect Fund Level ⁽²⁾	Total Fund Level
Large Cap Funds	\$ -	\$ 39,353	\$ 39,353
Mid Cap Funds	-	322,933	322,933
Small Cap Funds	-	309,213	309,213
International Equity Funds	732,743	554,428	1,287,171
Fixed Income Funds	-	673,737	673,737
Infrastructure	516,875	310,839	827,714
Real Estate	243,317	379,858	623,175
Investment Consultant	195,582	-	195,582
Custodial Bank	75,965	-	75,965
Actuarial Expense	78,000	-	78,000
Other Investment Expense	88,860	-	88,860
Total Investment Expenses	\$ 1,931,342	\$ 2,590,631	\$4,521,703

(1) These fees are paid directly by MCERA.

(2) These fees are included in unrealized activity as they are net of the fund and are estimated for transparency and reporting purposes.

Schedule of Payments to Consultants (Other Than Investment Managers)

For the Fiscal Year Ended June 30, 2025

2025

Actuarial Expense	\$ 78,000
Audit Services	43,500
Investment Consultant	195,582
Custodian Services	75,965
General Consultant – Actuary	35,212
Pension IT Services	181,179
Disability Medical Reviews	11,850
Legal Counsel	168,146
Total Payments to Consultants	\$ 789,434

Schedule of Administrative Expenses

For the Fiscal Year Ended June 30, 2025

Personnel Services:

Salaries and Wages	\$ 562,611
Other Benefits	124,005
Employee Retirement	207,366
Total Personnel Services	893,982

Professional Services:

Legal Expense – General	168,146
Disability Medical Review	11,850
General Consultant - Actuary	35,212
External Audit Fees	43,500
Total Professional Services	258,708

Miscellaneous:

Office Expenses	26,570
Rent and Leases	58,826
Memberships	6,485
Board Meeting Stipends and Contracts	17,207
Training and Travel	23,344
Total Miscellaneous	132,432

Total Administrative Expenses¹	\$ 1,285,122
Total Information Technology (IT) Expense	\$ 210,588
Total Administrative and IT Expense	\$ 1,495,710

¹ Excludes Information Technology expenses as defined in Government Code Section 31580.2.

Administrative Budget: Government Code § 31580.2 states in part, "...the respective board or boards shall annually adopt a budget covering the entire expense of administration of the retirement system which expense shall be charged against the earnings of the retirement fund. The expense incurred in any year may not exceed the greater of the following: 1) Twenty-one hundredths of 1 percent of the accrued actuarial liability of the retirement system. 2) Two million dollars (\$2,000,000), as adjusted annually by the amount of the annual cost of living adjustment...". MCERA's administrative expenses met the requirements of this section in fiscal year 2024-25 as the total expenses excluding IT expense were less than the administrative cap at 21/100% of the accrued actuarial liability.

Performance Summary

Mendocino County Employees' Retirement Association

Executive Summary

Fiscal Year Ended June 30, 2025

Market Overview

Donald Trump's election as the 47th president of the United States, along with a Republican sweep in Congress, set the tone for fiscal year 2025. While monetary policy shifts and fiscal uncertainty produced mixed results in late 2024, the calendar year ended on a strong note. U.S. markets were supported by a resilient economy, rapid advances in artificial intelligence (AI), and an improving—though increasingly uncertain—outlook for inflation. Global markets, however, contended with slowing momentum, geopolitical tensions, and persistent currency volatility.

The Federal Reserve delivered three rate cuts late in 2024, and investors quickly turned their attention to the potential implications of the new administration's policy agenda, which introduced significant uncertainty for 2025 and beyond. Those risks materialized swiftly in early 2025 as policy changes, including federal spending cuts and aggressive trade measures, heightened market volatility, pushed inflation expectations higher, and provoked strong reactions abroad. Investors sought traditional safe havens such as Treasuries and gold, while U.S. equities repriced to reflect the more uncertain macroeconomic backdrop.

"Liberation Day" marked the beginning of 2Q25 and introduced what market participants soon dubbed the "TACO trade" ("Trump Always Chickens Out"). A new executive order imposed a baseline 10% tariff on all imported goods, along with additional reciprocal tariffs on select countries. The S&P 500 responded with one of its worst two-day declines in 75 years, falling 10.5%, while long-term Treasury yields rose. Just a week later, the White House announced a 90-day pause on reciprocal tariffs, sparking a rebound. A similar 90-day pause on U.S.–China tariffs followed in May, after escalation had driven some tariffs into triple digits. Markets grew increasingly attuned to these pivots in trade policy, with the S&P 500 ultimately recovering strongly.

Economic data underscored the more fragile backdrop. Real GDP grew at an annualized rate of 2.4% in the fourth quarter of 2024, down from 3.1% the prior quarter, before contracting in the first quarter of 2025 as exports weakened. Growth then rebounded to 3.3% in the second quarter, supported by a sharp decline in imports.

Monetary policy shifted meaningfully during the fiscal year. In September 2024, the Federal Reserve cut the federal funds rate by 50 bps to 4.75%–5.00%, followed by additional 25 bps cuts in November and December. By early 2025, the Fed adopted a more cautious stance, holding rates steady in March while monitoring the evolving risks of tariffs and inflation. Inflation data showed little immediate impact from tariffs: headline CPI rose 2.4% year-over-year in May, while core CPI increased 2.8%. Price pressures were concentrated in food and shelter, offset by declines in energy, vehicles, and apparel.

The labor market remained resilient, with the unemployment rate holding steady at 4.2% in May, roughly the same level as one year ago. However, there were signs of softening: the U.S. economy added 139,000 jobs in May, down from 177,000 in April, with employment declining in manufacturing, retail, and government sectors. The latest Job Openings and Labor Turnover Survey (JOLTS) showed an increase in job openings in May, but hiring remained subdued.

The dollar endured one of its weakest starts in decades, spiraling lower as the trade war escalated, marking one of its worst starts to a year since 1973, when the U.S. left the gold standard. The ICE U.S. Dollar Index, which measures the dollar against a basket of six major currencies, fell roughly 10% through the first half of 2025. This sharp decline reflected a mix of factors, including expectations of Federal Reserve policy easing and lower yields, concerns over U.S. fiscal sustainability, and efforts by foreign central banks to diversify reserves as part of a broader push to reduce reliance on the dollar.

By fiscal year-end, debates over fiscal sustainability, trade, and monetary policy culminated in a U.S. credit downgrade and contentious budget negotiations. Domestically, tax relief and spending cuts advanced rapidly through Congress, while tariffs repeatedly escalated and de-escalated, fueling market swings. The Fed's independence came under scrutiny, the dollar remained under pressure, and geopolitical risks intensified abroad. Yet markets recovered strongly into fiscal year-end—underscoring investor resilience despite a highly complex policy environment.

U.S. equity markets closed fiscal year 2025 in positive territory, extending the strong gains of fiscal year 2024. The Russell 3000 Index, a broad measure of U.S. equities, advanced 6.2% in 3Q24 and 2.6% in 4Q24, before declining 4.7% in 1Q25 and rebounding 11.0% in 2Q25 to finish the year up 15.3%. The S&P 500 Index followed a similar trajectory, rising 10.9% in the final quarter and 15.2% for the fiscal year. Technology stocks, particularly the “Magnificent 7”, remained clear leaders as the artificial intelligence race accelerated.

In a reversal from previous years trends, global ex-U.S. equities outperformed U.S. stocks, supported by a weaker dollar. The MSCI All Country World Index ex U.S. (Net) Index, a broad benchmark of developed and emerging markets outside of the U.S., climbed 17.7% for the fiscal year. The MSCI All Country World Index (Net), which includes the U.S., gained 16.2%. European equities posted broad-based gains amid increased defense spending and accommodative monetary policy. Several emerging markets also performed well, with Korea and Taiwan standing out amid renewed investor enthusiasm for semiconductor and technology supply chains.

The Bloomberg U.S. Aggregate Bond Index, the standard measure of investment-grade domestic bonds, returned 6.1% for the fiscal year, supported by safe-haven demand following tariff shocks. Fixed income markets posted modest gains in 2Q25 amid ongoing rate volatility. Treasury yields shifted notably during the year: in September the yield curve un-inverted for the first time since July 2022, with the spread between 2-year and 10-year Treasuries steepening further in 4Q24. The index rose 2.8% in 1Q25 as the 10-year yield peaked near 4.8% in January on hotter inflation data, before retreating to 4.2% by the end of March. Despite mid-quarter swings, including a brief spike above 4.5%, the 10-year yield ultimately ended the fiscal year at 4.2%.

Real estate markets showed signs of recovery. Private real estate, as measured by the NCREIF Property Index, advanced 4.2% in fiscal year 2025 after two consecutive years of negative returns, suggesting valuations may have bottomed outside of the challenged office and hotel sectors. Public real estate, represented by the FTSE NAREIT All Equity Index, outpaced private markets with a 9.2% return for the fiscal year.

The following table highlights the various asset class benchmark returns by quarter and for the fiscal year.

Index	3Q24	4Q24	1Q25	2Q25	Fiscal Year
US Equity (Russell 3000)	6.2%	2.6%	-4.7%	11.0%	15.3%
Intl Equity (MSCI ACWI ex-U.S.)	8.1%	-7.6%	5.2%	12.0%	17.7%
Fixed Income (Bloomberg Aggregate)	5.2%	3.1%	2.8%	1.2%	6.1%
Real Estate (NFI-ODCE)	-0.1%	0.8%	0.8%	0.8%	2.5%

Asset Allocation

As of June 30, 2025, the assets of MCERA were valued at \$793.6 million, up from the total asset value at the start of the fiscal year, July 1, 2024, of \$715.4 million. Approximately \$88.0 million in unrealized investment gains and \$9.8 million in net withdrawals accounted for the increase in assets. Actual allocations to domestic fixed income and domestic real estate were relatively underweight to that of the target and were offset by relative overweights to domestic equity, international equity, and infrastructure. All asset classes remain within their permitted ranges.

Asset Class	\$000s Actual	Weight Actual	Target	Percent Difference	\$000s Difference
Domestic Equity	297,880	37.5%	37.0%	0.5%	4,255
International Equity	204,141	25.7%	25.0%	0.7%	5,745
Domestic Fixed Income	159,976	20.2%	21.0%	(0.8%)	(6,676)
Infrastructure	59,018	7.4%	6.0%	1.4%	11,403
Domestic Real Estate	72,325	9.1%	11.0%	(1.9%)	(14,970)
Cash	243	0.0%	0.0%	0.0%	243
Total	793,582	100.0%	100.0%		

Total Fund Performance

MCERA's Total Fund gained 12.33% for the fiscal year ending June 30, 2025 versus the Policy Index's 11.88% return on a time weighted return basis. For the same time period measured, MCERA's money-weighted rate of return net of investment fees was 12.25%.

As shown in the fiscal year attribution below, active manager effects in international equities, domestic fixed income, real estate, and infrastructure contributed to Total Fund outperformance, while slight deviations from the policy target had a negative impact.

One Year Relative Attribution Effects

Asset Class	Effective Actual Weight	Effective Target Weight	Actual Return	Target Return	Manager Effect	Asset Allocation	Total Relative Return
Domestic Equities	37%	37%	13.22%	15.30%	(0.77%)	(0.02%)	(0.78%)
International Equities	25%	25%	19.50%	17.72%	0.42%	(0.03%)	0.39%
Domestic Fixed Income	21%	21%	6.76%	6.08%	0.15%	0.01%	0.15%
Real Estate	10%	11%	3.29%	2.47%	0.09%	0.11%	0.19%
Cash	0%	0%	0.00%	0.00%	0.00%	(0.04%)	(0.04%)
Infrastructure	8%	6%	11.55%	2.47%	0.72%	(0.18%)	0.54%
Total	12.33% = 11.88% + 0.60% + (0.14%)						0.45%

Overall, the Total Fund ranked in the 8th percentile within Callan's Public Fund Sponsor universe for the fiscal year. Longer term annualized Total Fund returns are roughly in-line with the Policy Index and rank favorably versus other public fund sponsors, finishing 22nd, 35th, and 30th for the trailing 5-, 7-, and 10-year periods, respectively.

Summary

The fiscal year ending June 30, 2025, delivered strong market gains despite ongoing policy and geopolitical uncertainties. This period underscores how quickly markets can shift from fear to optimism, often in ways that defy short-term headlines. Callan continues to recommend maintaining a disciplined investment process anchored by a well-defined long-term asset allocation policy. Accordingly, the MCERA Plan remains well diversified across global capital markets and has a wide range of investment strategies.

Outline of Investment Policies and Objectives

The Board of Retirement (Board) has exclusive control of all investments of the retirement system and is responsible for establishing investment objectives, strategies and policies.

Pursuant to the California Constitution and the 1937 County Employees Retirement Act, the Board is authorized to invest in any form or type of investment deemed prudent in the informed judgment of the Board. In making decisions regarding the MCERA investment portfolio, the Board acts in a fiduciary capacity and must discharge its duties in accordance with fiduciary principles. In this regard, investment decisions are to be made in the sole interest and for the exclusive purpose of providing benefits to participants in the retirement system and their beneficiaries and defraying the reasonable expenses of administering the retirement system.

The Board of Retirement has adopted an Investment Policy, which provides the framework for the management of MCERA's investments. The Investment Policy establishes the general goals of the investment program, the policies and procedures for management of the investments, specific assets allocations, rebalancing procedures and investment guidelines, performance objectives and risk controls. The Investment Policy also defines the principal duties of the Board, MCERA's investment consultant and MCERA's investment managers. The Board makes revisions to the Investment Policy as necessary.

Pursuant to the Investment Policy, the basic goal of MCERA's investment program is to obtain a fully funded plan status, while assuming a risk posture consistent with the Board's risk tolerance. In pursuing this goal, the Board has adopted a long-term investment horizon in which the chances and duration of investment losses are carefully weighed against the long-term potential for appreciation of assets. The primary investment objective is to meet the actuarial assumption for return on assets. The risk assumed in the pursuit of this investment objective must be appropriate for the return anticipated and consistent with the total diversification of the fund. All transactions undertaken will be for the sole benefit of MCERA's members and beneficiaries and for the exclusive purpose of providing benefits to them, minimizing contributions to the Plan and defraying reasonable associated administrative expenses.

The asset allocation plan adopted by the Board is an integral part of MCERA's investment program. It is designed to provide an optimum, diversified mix of asset classes with return expectations to satisfy expected liabilities, while minimizing risk exposure.

Asset Allocation

The Board reviews the Association's investment results each quarter. Periodically, the Board reviews the asset allocation, taking into consideration the latest actuarial study. Based on this review, the Board adopts an asset allocation mix with the goal of helping the Association achieve a fully funded status. Each asset class has a target allocation. The Association treats these targets as long-term funding objectives. Adhering to these targets allows the Association to keep investment risk at a manageable level and minimizes investment costs.

One keystone of asset allocation is diversification among asset classes. Diversification helps to maintain risk at a tolerable level. Therefore, the Board reviews the investment performance and volatility of each asset class on a regular basis over various time periods (quarterly, annually, multi-year) to ensure that the current allocation continues to meet the Association's needs.

Over time, the Board implements the asset allocation plan by hiring investment managers to invest assets on behalf of the Association, subject to investment guidelines incorporated into each fund's investment management mandate.

A comparison of the current asset allocation with the previous fiscal year's asset allocation is provided below and on the following page. The current target allocation vs. actual allocation graph is displayed below:

Current Year (FY25) Target Asset vs Actual Asset Allocation ¹

Asset Class	\$000s Actual	Weight Actual	Target	Percent Difference	\$000s Difference
Domestic Equity	297,880	37.5%	37.0%	0.5%	4,255

Re: June 30, 2025 actuarial valuation for the Mendocino County Employees Retirement Association

Dear Members of the Board:

Segal prepared the June 30, 2025 annual actuarial valuation of the Mendocino County Employees Retirement Association (MCERA). We certify that the valuation was performed in accordance with generally accepted actuarial principles and practices. In particular, it is our understanding that the assumptions and methods used for funding purposes meet the parameters set by the Actuarial Standards of Practice (ASOPs). Actuarial valuations are performed on an annual basis. The actuarial calculations presented in the valuation report have been made on a basis consistent with our understanding of the historical funding methods used in the determination of the liability for retirement benefits.

The June 30, 2025 actuarial valuation is based on the plan of benefits verified by MCERA and on participant and financial data provided by MCERA. Segal conducted an examination of all participant data for reasonableness, and we concluded that it was reasonable and consistent with the prior year's data. Summaries of the employee data used in performing the actuarial valuations over the past several years are provided in our valuation report.

We did not audit the Association's financial statements. For actuarial valuation purposes, Plan assets are valued at actuarial value. Under this method, the assets used to determine employer contribution rates take into account market value by recognizing the differences between the total return at market value and the expected investment return on market value over a five-year period.¹ The full value of market fluctuations is not recognized in a single year and, as a result, the asset value and the plan costs are more stable.

One of the general goals of an actuarial valuation is to establish contribution rates that fully fund the Association's liabilities, and that, as a percentage of payroll, remain as level as possible for each generation

¹ Based on action taken by the Board on November 20, 2024, the total deferred investment gain of \$145,088 through June 30, 2024 will be recognized in four level amounts, with three years of recognition remaining after the June 30, 2025 valuation.

ACTUARIAL SECTION | Actuary's Certification Letter

of active members. Actuarial funding is based on the Entry Age Cost Method. The employer contribution rate provides for both current cost (normal cost) and a level percentage of payroll to amortize any unfunded actuarial accrued liability (UAAL).

For the June 30, 2025 valuation results, we applied the Board's funding policy to amortize the outstanding balance of the Association's UAAL from the June 30, 2012 valuation over a declining period. On December 15, 2021, and as part of the June 30, 2021 valuation, the Board reduced the amortization period for the 2012 UAAL restart layer by 3 years, from 18 years remaining as of June 30, 2021 to 15 years (11 years as of June 30, 2025). Any new UAAL established after June 30, 2012 has continued to be amortized over separate layers with different remaining amortization periods. (For example, gains and losses as well as changes in assumptions and methods are amortized over 18 years.)

The actuarial computations made are for funding plan benefits. Accordingly, additional determinations will be needed for other purposes, such as satisfying accounting requirements under Governmental Accounting Standards Board (GASB) Statements No. 67 and 68 and judging benefit security at termination of the plan.

Segal prepared all of the supporting schedules in the Actuarial Section of the Annual Comprehensive Financial Report (ACFR) and certain supporting schedules in the Financial Section, based on the results of the June 30, 2025 actuarial valuation. A listing of the supporting schedules Segal prepared for inclusion in the Financial Section as Required Supplementary Information prescribed by GASB,² and in the Actuarial Section, is provided below:

Financial Section:

1. Schedule of Net Pension Liability³
2. Schedule of Changes in Net Pension Liability and Related Ratios³

Actuarial Section:

3. Summary of Assumptions and Funding Method
4. Probabilities of Separation from Active Service
5. Actuarial Assumptions for Merit and Promotion Salary Increase Rates
6. Schedule of Active Member Valuation Data
7. Schedule of Retirees and Beneficiaries Added to and Removed from Retiree Payroll
8. Schedule of Funded Liabilities by Type
9. Actuarial Analysis of Financial Experience
10. Development of Actuarial Value of Assets
11. Summary of Plan Provisions
12. Schedule of Funding Progress
13. Schedule of Contributions – Last Ten Fiscal Years³
14. Projection of Pension Plan Fiduciary Net Position for Use in Calculation of Discount Rate as of June 30, 2025³

² These schedules were included in Segal's separate GASB 67 actuarial valuation report as of June 30, 2025.

³ Source: Segal's GASB 67 valuation report as of June 30, 2025.

MCERA's staff prepared other trend data schedules in the Statistical Section based on information supplied in Segal's valuation report.

The valuation assumptions included in the Actuarial Section were adopted by the Retirement Board based on our recommendations following the Experience Analysis as of June 30, 2022. It is our opinion that the assumptions used in the June 30, 2025 valuation produce results that, in the aggregate, reflect the future experience of the Plan. In addition, in our opinion, the combined effect of these assumptions is expected to have no significant bias. An experience analysis is performed every three years. The next experience analysis is due to be performed as of June 30, 2025 and the assumptions adopted from that study will be used in the June 30, 2026 valuation.

In the June 30, 2025 valuation, the ratio of the valuation assets to actuarial accrued liabilities increased from 74.2% to 76.4%. The employer's aggregate contribution rate has decreased from 41.82% to 40.27% of payroll. The employees' aggregate rate has increased from 10.24% to 10.28% of payroll. The main reasons for the decrease in the employer contribution rate include the effect of amortizing the prior year's UAAL over a larger than expected projected total salary, 2025 COLA increases lower than expected, and the investment gain (after asset smoothing), offset somewhat by individual salary increases for actives greater than expected and other demographic losses. The increase in the employees' aggregate rate is due to changes in active member demographics.

In the June 30, 2025 valuation, the actuarial value of assets excluded a \$31.5 million net deferred investment gain, which represents about 4.0% of the market value of assets. (Note that in the previous valuation, this amount was a net deferred gain of \$145 thousand.) If the net deferred investment gain was recognized immediately in the actuarial value of assets, the funded percentage would increase from 76.4% to 79.6% and the aggregate employer contribution rate, expressed as a percentage of payroll, would decrease from 40.27% to about 37.5% of payroll.

This document has been prepared for the exclusive use and benefit of the Board of Retirement of the Mendocino County Employees Retirement Association, based upon information provided by MCERA or otherwise made available to Segal at the time this document was created. Segal makes no representation or warranty as to the accuracy of any forward-looking statements and does not guarantee any particular outcome or result. This document should only be copied, reproduced or shared with other parties in its entirety for the proper administration of the Plan. This document does not constitute legal, tax, accounting, or investment advice or create or imply a fiduciary relationship. You are encouraged to discuss any issues raised with your legal, tax and other advisors before taking, or refraining from taking, any action.

To the best of our knowledge, the June 30, 2025 actuarial valuation report is complete and accurate and in our opinion presents the Plan's current funding information. The undersigned are members of the American Academy of Actuaries and meet the qualification requirements to render the actuarial opinion contained herein.

Sincerely,

Todd Tauzer, FSA, MAAA, FCA, CERA
Senior Vice President and Actuary

Andy Yeung, ASA, MAAA, FCA, EA
Vice President and Actuary

Daniel Siblik, ASA, MAAA, FCA, EA
Vice President and Actuary

Summary of Assumptions and Funding Method

The Entry Age Actuarial Cost Method was used in conjunction with the following actuarial assumptions. The funding policy adopted by the Board is to amortize the Association’s outstanding balance of the unfunded actuarial accrued liability (UAAL) from the June 30, 2012 valuation over a declining period. On December 15, 2021, and as part of the June 30, 2021 valuation, the Board reduced the amortization period for the 2012 UAAL restart layer by 3 years, from 18 years remaining as of June 30, 2021 to 15 years (11 years as of June 30, 2025). Any new UAAL established after June 30, 2012 has continued to be amortized over separate layers with different remaining amortization periods. (For example, gains and losses as well as changes in assumptions and methods are amortized over 18 years.) The Board has adopted the following economic assumptions for the June 30, 2025 valuation:

ASSUMPTIONS

Valuation Interest Rate	6.50%
Inflation Rate	2.50 %
Across the Board Salary Increase	0.50%
Interest Credited to Member Accounts	2.50%, compounded semi-annually
Cost of Living Adjustment	Retiree benefits for General Tiers 1, 2, and 3, Safety Tiers 1 and 2, and Probation Tiers 1 and 2 are assumed to increase at 2.75% per year (for non-CalPEPRA members with a sufficient COLA bank, withdrawals from the bank can be made to increase the retiree COLA up to 3% per year). There are no COLA increases for General Tier 4, Safety Tier 3, or Probation Tier 3.
Asset Valuation	5-year smoothed actuarial value

The following demographic and salary increase assumptions were used for the actuarial valuation as of June 30, 2025. The assumptions were selected by the actuary and approved by the Board as part of the June 30, 2022 actuarial experience study.

Post-Retirement Mortality

(a) *Healthy*

General Members	Pub-2010 General Healthy Retiree Amount-Weighted Mortality Tables (separate tables for males and females) with rates decreased by 5% for males and increased by 5% for females, projected generationally with the two-dimensional mortality improvement scale MP-2021.
Safety and Probation Members	Pub-2010 Safety Healthy Retiree Amount-Weighted Mortality Tables (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2021.

(b) Disabled

General Members

Pub-2010 Non-Safety Disabled Retiree Amount-Weighted Mortality Tables (separate tables for males and females) with rates decreased by 5%, projected generationally with the two-dimensional mortality improvement scale MP-2021.

Safety and Probation Members

Pub-2010 Safety Disabled Retiree Amount-Weighted Mortality Tables (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2021.

(c) Beneficiaries

Beneficiaries not currently in Pay Status

Pub-2010 General Healthy Retiree Amount-Weighted Mortality Tables (separate tables for males and females) with rates decreased by 5% for males and increased by 5% for females, projected generationally with the two-dimensional mortality improvement scale MP-2021.

Beneficiaries currently in Pay Status

Pub-2010 Contingent Survivor Amount-Weighted Mortality Tables (separate tables for males and females) with rates increased by 5%, projected generationally with the two-dimensional mortality improvement scale MP-2021.

(d) For Employee Contribution Rate Purposes

General Members

Pub-2010 General Healthy Retiree Amount-Weighted Mortality Tables (separate tables for males and females) with rates decreased by 5% for males and increased by 5% for females, projected 30 years (from 2010) with the two-dimensional mortality improvement scale MP-2021, weighted 30% male and 70% female.

Safety and Probation Members

Pub-2010 Safety Healthy Retiree Amount-Weighted Mortality Tables (separate tables for males and females), projected 30 years (from 2010) with the two-dimensional mortality improvement scale MP-2021, weighted 80% male and 20% female.

Pre-Retirement Mortality

(a) General Members

Pub-2010 General Employee Amount-Weighted Mortality Tables (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2021.

(b) Safety and Probation Members

Pub-2010 Safety Employee Amount-Weighted Mortality Tables (separate tables for males and females), projected generationally with the two-dimensional mortality improvement scale MP-2021.

Summary of Assumptions and Funding Method (Continued)

Termination Rates	Based upon the Experience Analysis as of 6/30/2022 (Table 1).
Disability Rates	Based upon the Experience Analysis as of 6/30/2022 (Table 1).
Service Retirement Rates	Based upon the Experience Analysis as of 6/30/2022 (Table 1).
Reciprocity Assumption	65% of members who terminate with a vested benefit are assumed to enter a reciprocal system. For reciprocals, 4.00% compensation increases per annum are assumed.
Salary Scales	As shown in Table 2. (Page 71)
Spouses and Dependents	70% of male employees and 50% of female employees assumed married at retirement, with wives assumed two years younger than husbands.
Deferred Vested Retirement Age	61 for General members; 54 for Safety and Probation members. For deferred vested members who terminate with less than five years of service and are not vested, it is assumed they will retire at age 70 if they decide to leave their contributions on deposit.
Future Benefit Accruals	1.0 year of service per year of employment plus 0.017 years of additional service to anticipate conversion of unused sick leave for each year of employment, for members expected to retire directly from active employment and to receive a service retirement benefit.

Probabilities of Separation from Active Service – Table 1

The probabilities shown for each cause of separation represent the likelihood that a given member will separate at a particular age for the indicated reason. For example, if the probability of disability of a General member at age 40 is 0.0013, then we are assuming that 0.13% of the active General members at age 40 will receive a disability retirement during the next year.

General Members

Years of Service	Termination ¹	Years of Service	Termination ¹	Years of Service	Termination ¹
0-1	.2300	5-6	.0800	10-14	.0650
1-2	.1900	6-7	.0700	14-16	.0650
2-3	.1400	7-8	.0700	16+	.0650
3-4	.1200	8-9	.0700		
4-5	.0900	9-10	.0650		

Age	Mortality Male ²	Mortality Female ²	Disability ³	Service Retirement Tiers 1, 2, & 3	Service Retirement Tier 4
20	.0004	.0001	.0001	.0000	.0000
30	.0004	.0002	.0001	.0000	.0000
40	.0007	.0004	.0013	.0000	.0000
50	.0015	.0008	.0042	.0500	.0000
60	.0032	.0019	.0056	.1200 ⁴	.0600

¹ For members with less than five years of service, 90% of all terminated members will choose a refund of contributions and 10% will choose a deferred vested benefit. For members with five or more years of service, 20% of all terminated members will choose a refund of contributions and 80% will choose a deferred vested benefit. No termination is assumed after a member is eligible for retirement.

² 100% of General deaths are assumed to be non-service connected deaths. Note that generational projections beyond the base year (2010) are not reflected in the above mortality rates.

³ 60% of General disabilities are assumed to be service connected disabilities. The other 40% are assumed to be non-service connected disabilities.

⁴ For members with 30 or more years of service, the probability is 0.2500.

Probabilities of Separation from Active Service – Table 1 (Continued)

Safety and Probation Members

Years of Service	Termination¹	Years of Service	Termination¹	Years of Service	Termination¹

¹ Includes effect of data updates for reciprocal vested members (\$12,041).

² Includes impact of eliminating the Contingency Reserve.

³ Effect of including cost of \$1,000 post-retirement lump sum death benefit.

⁴ Includes (gain)/loss due to one-year delay in implementing employer contribution rates, and contribution (gain)/loss due to total payroll increase higher or lower than expected. Starting with plan year ending 6/30/2024, includes the contribution (gain)/loss on employee contributions.

Development of Actuarial Value of Assets

(Dollars in Thousands)

1. Market value of assets as of June 30, 2025					\$793,440
2. Calculation of deferred return:	Actual Market Return (net)	Expected Market Return (net)	Investment Gain / (Loss)	Deferred Factor	Deferred Return
a. Year ended June 30, 2022	(67,368)	46,769	(114,137)	75%	\$109 ¹
b. Year ended June 30, 2023	50,178	41,704	8,474		
c. Year ended June 30, 2024	61,117	42,832	18,285		
d. Year ended June 30, 2025	85,535	46,248	39,287	80%	31,429
e. Total deferred return ²					\$31,538
3. Preliminary actuarial value of assets as of June 30, 2025: (1) – (2e)					\$761,902
4. Adjustment to be within 25% corridor of market value					\$0
5. Final actuarial value of assets as of June 30, 2025: (3) + (4)					\$761,902
6. Actuarial value as a percentage of market value: (5) / (1)					96.0%

Note: Amounts may not total exactly due to rounding.

Actuarial Value of Assets:

For purposes of calculating the required contribution rates for the valuation, a smoothed market value of the fund's assets is used. Under this approach, recognition is given each year to total earnings of the fund to date. The current method adjusts market value to recognize, over a five-year period, differences between assumed and actual investment return.

¹ Based on action taken by the Board on November 20, 2024, the total deferred investment gain of \$145,088 through June 30, 2024 will be recognized in four level amounts, with three years of recognition remaining after the June 30, 2025 valuation.

² Deferred return as of June 30, 2025 to be recognized in each of the next four years:

- (a) Amount recognized on June 30, 2026 \$7,893,598
- (b) Amount recognized on June 30, 2027 \$7,893,598
- (c) Amount recognized on June 30, 2028 \$7,893,598
- (d) Amount recognized on June 30, 2029 \$7,857,327
- (e) Total unrecognized return as of June 30, 2025 \$31,538,121

Summary of Plan Provisions

Briefly summarized below are the major provisions of the County Employees Retirement Law of 1937, as amended through June 30, 2025.

Plan Type and Plan Sponsors

Cost-sharing multiple-employer defined benefit plan. The participating employers are the County of Mendocino, the Superior Court of Mendocino, and the Russian River Cemetery District.

Actuarial Funding Policy

The Mendocino County Board of Retirement establishes the Actuarial Practices and Funding Policy to help ensure future benefit payments for members of MCERA.

MCERA's annual funding requirement is comprised of a payment of the Normal Cost and a payment on the Unfunded Actuarial Accrued Liability (UAAL). The Normal Cost and the amount of payment on UAAL are determined by following three components of this funding policy:

1. Actuarial Cost Method: the techniques to allocate the cost/liability of retirement benefit to a given period;
2. Asset Smoothing Method: the techniques that spread the recognition of investment gains or losses over a period of time for the purposes of determining the Actuarial Value of Assets used in the actuarial valuation process; and
3. Amortization Policy: the decisions on how, in terms of duration and pattern, to reduce the difference between the Actuarial Accrued Liability and the Valuation Value of Assets in a systematic manner.

The Board has adopted the following regarding its actuarial funding policy:

Actuarial Cost Method: The Entry Age actuarial cost method shall be applied to the projected retirement benefits in determining the Normal Cost and the Actuarial Liability.

Asset Smoothing Method: The investment gains or losses of each valuation period, as a result of comparing the actual market return and the expected return on Valuation Value of Assets shall be recognized in level amount over 5 years in calculating the Actuarial Value of Assets. Deferred investment gains or losses cannot exceed 25% of the Market Value of Assets. The Board acknowledges the occasional need for and reserves the right to consider future ad-hoc adjustments to the asset smoothing method to achieve a more level pattern of recognition of the net deferred investment gains or losses after a period of significant market change followed by a period of market correction, upon receiving the necessary analysis from its actuary.

Amortization Policy: The UAAL (i.e., the difference between the Actuarial Accrued Liability and the Valuation Value of Assets), as of June 30, 2012 shall continue to be amortized over its declining 30-year schedule; As of June 30, 2021, the remaining amortization period of the June 30, 2021, base layer of the UAAL was reduced from 18 years to 15 years (with 11 years remaining as of June 30, 2025); Any new

Summary of Plan Provisions (Continued)

Amortization Policy (Continued):

UAAL as a result of actuarial gains or losses identified in the actuarial valuations as of June 20, 2013 or later will be amortized over a period of 18 years; Any new UAAL as a result of change in the actuarial assumptions or methods, effective with the actuarial valuation as of June 2013 or later will be amortized over a period of 18 years; Unless an alternative amortization period is recommended by the Actuary and accepted by the Board based on the results of an actuarial analysis: a. With the exception noted in b. below, the increase in UAAL as a result of any plan amendments will be amortized over a period of 15 years; b. The increase in UAAL resulting from a temporary retirement incentive will be funded over 5 years; UAAL shall be amortized over “closed” amortization periods so that the amortization period for each layer decreases by one year with each actuarial valuation; UAAL shall be amortized as a level percentage of payroll so that the amortization amount in each year during the amortization period shall be expected to be a level percentage of estimated covered payroll, based on the current actuarial assumption for general payroll increase; In addition to the UAAL contribution rate, an amortization amount equal to the UAAL contribution rate times the covered payroll (as estimated in the actuarial valuation that establishes such UAAL contribution rate) shall be calculated for each employer. The final UAAL payment by each employer shall be equal to the UAAL contribution rate times the actual covered payroll or the above amortization amount, if greater; and, if an overfunding exists (i.e., the total of all UAAL becomes negative so that there is a surplus and the amount of such surplus is in excess of 20% of the AAL per Section 7522.52 of CalPEPRA), such actuarial surplus and any subsequent surpluses will be amortized over an “open” amortization period of 30 years. Any prior UAAL amortization layers will be considered fully amortized, and any subsequent UAAL will be amortized as the first of a new series of amortization layers, using the above amortization periods.

Membership

Membership usually begins with the first day of the pay period following the date of entrance into service.

Final Compensation

For General, Safety, and Probation Tiers 1, final compensation is defined as the highest consecutive twelve months of compensation earnable. For General Tiers 2 and 3, and Safety and Probation Tiers 2, final compensation is defined as the highest consecutive thirty-six months of compensation earnable. For General Tier 4, and Safety and Probation Tiers 3, final compensation is defined as the highest consecutive 36 months of pensionable compensation.

Return of Contributions

If a member should resign or die before becoming eligible for retirement, his or her contribution plus interest may be refunded. In lieu of receiving a return of contributions, a member may elect to leave his or her contributions on deposit. Members may choose to receive a deferred vested benefit when eligible for retirement.

Summary of Plan Provisions (Continued)

Service Retirement Benefit

For General Tiers 1, 2, and 3, and Safety and Probation Tiers 1 and 2, members are eligible to retire at age 50 with 5 years of service and 10 years of membership, or age 70, or after 30 years of service (20 years for Safety and Probation), regardless of age. For General Tier 4, members are eligible to retire at age 52 with 5 years of service or age 70. For Safety and Probation Tiers 3, members are eligible to retire at age 50 with 5 years of service or age 70.

Basis of Benefit Payments

Benefits are calculated based upon a combination of age, years of service, final compensation, and the benefit payment option selected by the member. For General Tiers 1, 2, and 3, and Safety and Probation Tiers 1 and 2, the maximum benefit payable to a member or beneficiary is 100% of final compensation. For General Tier 4, and Safety and Probation Tiers 3, there is no maximum benefit.

Cost of Living Benefit

For General Tiers 1, 2, and 3, and Safety and Probation Tiers 1 and 2, future cost of living benefit changes are based on the Consumer Price Index (CPI) up to a maximum of 3% per year. Any excess CPI is “banked.” There are no cost of living benefits for General Tier 4, Safety Tier 3, and Probation Tier 3.

Disability Benefit

Members with 5 years of service, regardless of age, are eligible for a non-service connected disability. The benefit is 1.8% of final compensation for each year of service. Generally, the maximum benefit is 1/3 of final compensation. The benefit for a service connected disability is the greater of 50% of final compensation or the service retirement benefit (if eligible).

Death Benefit - Prior to Retirement

In addition to the return of contributions, a death benefit is payable to the member's beneficiary or estate equal to one month's salary for each completed year of service under the retirement system. The death benefit is based on the salary earned during the last 12 months preceding the member's death, but not to exceed 6 month's salary.

If a member dies while eligible for service retirement or non-service connected disability, his or her spouse or domestic partner receives 60% of the allowance that the member would have received for retirement on the day of his or her death.

If a member dies in the performance of duty, the spouse or domestic partner will receive a lifetime benefit equal to 50% of the member's final compensation or a service retirement benefit whichever is higher.

Death Benefit - After Retirement

As part of the retirement process, members are required to select among several options for benefits continuation upon the member's death. For married retirees, the most common retirement option is the

Summary of Plan Provisions (Continued)

Death Benefit - After Retirement (Continued)

unmodified option, which pays the retiree's eligible spouse or domestic partner a lifetime benefit equal to 60% of the benefit the retiree was receiving.

In addition, a \$1,000 lump sum death benefit is paid to the estate or designated beneficiary upon the member's death.

Member's Contributions

Contribution rates for the employer and its covered employees are established and may be amended by the MCERA Board of Retirement, and then adopted by the County Board of Supervisors. The contribution rates are determined based on the benefit structure established by the employer. For General Tiers 1, 2, and 3, and Safety and Probation Tiers 1 and 2, members are required to contribute a percentage of their annual covered salary and their particular contribution rate is based upon age at entry into the Association. For General Tier 4, and Safety and Probation Tiers 3, members are required to contribute at least 50% of the Normal Cost rate. The employer is required to contribute the remaining amount necessary to finance the coverage of their employees through periodic contributions at actuarially determined rates.

Schedule of Funding Progress

The Schedule of Funding Progress is required supplementary information and presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing relative to the actuarial accrued liability for benefits over time.

Schedule of Funding Progress¹ (Dollar Amounts in Thousands)

Actuarial Valuation Date	Valuation Assets	Actuarial Accrued Liability (AAL)	Unfunded AAL (UAAL)	Funded Ratio	Covered Payroll	UAAL as a Percent of Covered Payroll

6/30/2024	714,967	963,283	248,316	74.2%	88,663	280.1%
6/30/2025	761,902	996,882	234,980	76.4%	93,246	252.0%

¹ Information prior to 2011 has been extracted from the previous actuary's past valuation reports.

² Excludes proceeds from Pension Obligation Bonds issued in December 2002.

³ Includes proceeds from Pension Obligation Bonds issued in December 2002 in the amount of \$76,299,000.

⁴ Starting with the 6/30/2011 valuation, payroll includes a projection for expected salary increases during the fiscal year following the valuation date, under the actuarial assumptions used in valuation.

Schedule of Contributions

Last Ten Fiscal Years

Year Ended June 30	Actuarially Determined Contributions	Contributions in Relation to the Actuarially Determined Contributions	Contribution Deficiency / (Excess)	Covered Payroll¹	Contributions as a Percentage of Covered Payroll
2016	19,129,191	19,129,191	0	57,407,928	33.32%
2017	19,116,426	19,116,426	0	59,801,480	31.97%
2018	20,430,644	19,116,426	0	64,340,578	31.75%
2019	23,702,064 ²	23,702,064 ²	0	68,254,197	34.73%
2020	24,647,132	24,647,132	0	72,040,768	34.21%
2021	26,333,815	26,333,815	0	77,319,043	34.06%
2022	30,485,006	30,485,006	0	81,780,476	37.28%
2023	30,309,355	30,309,355	0	85,729,491	35.35%
2024	32,095,794	32,095,794	0	87,186,296	36.81%
2025	36,514,688	36,514,688	0	89,732,027	40.69%

¹ Covered payroll represents Compensation Earnable and Pensionable Compensation and is defined as the payroll on which contributions to the pension plan are based.

² This amount includes additional UAAL contributions made by the Mendocino County Superior Court and the Russian River Cemetery District during FY 2018/2019 based on the minimum dollar UAAL amortization amount for FY 2017/2018. We understand that the Mendocino County Superior Court and the Russian River Cemetery District had paid \$31,588 and \$5,949 less than the minimum UAAL contributions in FY 2017/2018, respectively.

Projection of Pension Plan's Fiduciary Net Position for Use in Calculation of Discount Rate of 6.50%

For the Fiscal Year Ended June 30, 2025

(Dollars in Millions)

Year Beginning July 1	Projected Beginning Plan Fiduciary Net Position (a)	Projected Total Contributions (b)	Projected Benefit Payments (c)	Projected Administrative Expenses (d)	Projected Investment Earnings (e)	Projected Ending Plan Fiduciary Net Position $f=(a)+(b)-(c)-(d)+(e)$
2024	\$715	\$46	\$52	\$1	\$86	\$793
2025	793	44	57	2	51	830
2026	830	43	58	2	53	866
2027	866	42	60	2	55	901
2028	901	41	63	2	58	935
2029	935	40	65	2	60	968
2030	968	40	68	2	62	1,001
2031	1,001	40	70	2	64	1,032
2032	1,032	34	72	2	66	1,058
2033	1,058	34	74	2	67	1,083
2049	967	5	86	2	60	944

2101	5	0*	1	0*	0*	4
2140	0*	0*	0*	0*	0*	0*
2141	0*	0*	0*	0*	0*	0*

* Less than \$1 million when rounded.

Projection of Pension Plan's Fiduciary Net Position for Use in Calculation of Discount Rate (Continued)

Note that in preparing the above projections, we have not taken into consideration the one-year delay between the date of the contribution rate calculation and the implementation.

Notes:

1. Amounts may not total exactly due to rounding.
2. Amounts shown for the year beginning July 1, 2024 row are actual amounts, based on the unaudited financial statements provided by MCERA.
3. Various years have been omitted from this table.
4. Column (a): None of the projected beginning Plan Fiduciary Net Position amounts shown have been adjusted for the time value of money.
5. Column (b): Projected total contributions include employee and employer normal cost contributions based on closed group projections (based on covered active members as of June 30, 2025); plus employer contributions to the unfunded actuarial accrued liability; plus contributions to fund each year's annual administrative expenses reflecting an 18-year amortization schedule, based on the Plan's funding policy. Contributions are assumed to occur halfway through the year, on average.
6. Column (c): Projected benefit payments have been determined in accordance with paragraph 39 of GAS Statement No. 67, and are based on the closed group of active, inactive vested, retired members, and beneficiaries as of June 30, 2025. The projected benefit payments reflect the cost-of-living increase assumptions used in the June 30, 2025 report. Benefit payments are assumed to occur halfway through the year, on average. In accordance with paragraph 31.b.(1)(e) of GASB Statement No. 67, the long-term expected rate of return on Plan investments of 6.50% was applied to all periods of projected benefit payments to determine the discount rate.
7. Column (d): Projected administrative expenses are calculated as approximately 0.21% of the projected beginning Plan Fiduciary Net Position amount. The 0.21% proportion was based on the actual fiscal year 2024-2025 administrative expenses as a percentage of the beginning Plan Fiduciary Net Position amount as of July 1, 2023. Administrative expenses are assumed to occur halfway through the year, on average.
8. Column (e): Projected investment earnings are based on the assumed investment rate of return of 6.50% per annum.
9. As illustrated in this Exhibit, the Plan's Fiduciary Net Position was projected to be available to make all projected future benefit payments for current Plan members. In other words, there is no projected 'cross-over date' when projected benefits are not covered by projected assets. Therefore, the long-term expected rate of return on Plan investments of 6.50% per annum was applied to all periods of projected benefit payments to determine the Total Pension Liability as of June 30, 2025 shown earlier in this report, pursuant to paragraph 44 of GASB Statement No. 67.

Statistical Section

Summary of Statistical Data

This section provides additional detailed information in order to promote a more comprehensive understanding of this year's financial statements, note disclosures, and supplemental information. In addition, this section provides multiyear trends of the financial and operation information in order to facilitate the understanding of how the organization's financial position and performance have changed over time. This section provides contextual data for MCERA's changes in net position, benefit expenses, retirement types of benefit payments and membership data.
